How to use the Arlington County Precinct and Polling Place Finder

- 1. Numbered streets are listed first, but in alphabetical order, so 10th comes before 1st. All other streets follow alphabetically.**
- 2. Locate the name or number of the street. Make sure you correctly identify the street type (ST, RD, DR, CT, etc.) and street direction (N for North, S for South). Numbered streets will have the direction after the house numbers, and named streets will have the direction before the numbers.**
- 3. Look at the number range on the entries for the street to find the address you are seeking. Next, look very carefully at the code in the column labeled O/E/B:**

O = addresses on ODD side of street only

E = addresses on EVEN side of street only

B = addresses on BOTH sides of street (odd and even)

It is very important to note the correct O/E/B code for the entry, because in many locations, a street may be the division between precincts. Thus odd-numbered addresses could be in one precinct, while even-numbered addresses may be in another.

- 4. Once you have located the correct entry, follow across to see the Virginia Senate and House number districts, the polling place name, and the polling place address.**

A listing of all polling places in order follows the street listings.

Note: We do not guarantee the accuracy of all entries in this document. It is provided as an informational tool only.
