

9th Street South Street Improvement Project

Description

The Neighborhood Complete Streets program made accessibility improvements, including adding curb ramps, to 9th Street South. These improvements removed a barrier to access adjacent to the AT&T building, across the street from the Arlington Career Center.

Location

The improvements were installed on 9th Street South, between Walter Reed Drive and South Highland Street.

Process

Neighborhood Complete Streets program for street improvements. This street was highly ranked by the NCS *Project Ranking Guidelines*, which uses objective criteria about the existing conditions to score an area on safety, accessibility, and the intensity of nearby activities.

Timeline

The project was completed in spring 2024.
