

# 2017 SUMMARY OF RESULTS – H.B. Woodlawn

## OVERVIEW

### Survey Instrument

Arlington County has been conducting the Youth Risk Behavior Survey (YRBS) with a sample of Arlington Public School (APS) students in 6<sup>th</sup>-12<sup>th</sup> grade since 2001. The survey helps to inform the community about the important factors impacting the wellbeing of youth and families in our community. Arlington uses standard CDC questions whenever possible. Standard questionnaires can be found online at: <https://www.cdc.gov/healthyouth/data/yrbs/questionnaires.htm>. Each year community stakeholders have the opportunity to request the addition of certain questions. Whenever possible these additional questions are culled from established question repositories or are tested with youth prior to administration.

2017 is the first year that the survey has been conducted online. This allowed for the ability to monitor response rates in real-time and ensure that each school conducted the survey with sampled youth. This also allowed for the inclusion of branching. The YRBS survey has included upwards of 145 questions. Branching allowed for a more streamlined experience, but it is yet to be determined if that will impact the results collected. Generally, a branch was not employed unless the student answered that they did not engage in a behavior at least 2 times. For example, if a student answered they did not smoke on two questions they were not asked additional questions about smoking.

Two different surveys are used, one for 6<sup>th</sup> grade students and one for 8<sup>th</sup>-12<sup>th</sup> grade students. The questionnaire used for 6<sup>th</sup> graders is shorter and, by law (<https://www.cdc.gov/healthyouth/data/yrbs/questionnaires.htm>), cannot include questions about sexual health.

Copies of the questionnaires, as well as additional information about the survey can be found on the APCYF website at: <https://apcyf.arlingtonva.us/youth-risk-behavior-survey/>.

### Survey Administration

The survey was administered in March 2017 to a sample of APS students in 6<sup>th</sup>-12<sup>th</sup> grade. Additionally, the survey was administered to all students enrolled in APS' alternative programs (Career Center, Langston, New Directions, Arlington Community High School). Therefore, some of the overall results include students who are not in 6<sup>th</sup>, 8<sup>th</sup>, 10<sup>th</sup> or 12<sup>th</sup> grade, but rather are ungraded or in 9<sup>th</sup> or 11<sup>th</sup> grade. The survey given to 6<sup>th</sup> graders included 97 questions and was translated into Spanish. The survey given to 6<sup>th</sup>-12<sup>th</sup> graders contained 121 questions and was translated into Spanish. The survey was administered using an online survey platform.

A random sample of classrooms was taken from 6<sup>th</sup>-10<sup>th</sup> grade Health and P.E. classes and 12<sup>th</sup> grade English classes. These courses are sampled because they are required and therefore have a representative selection of all students, not just those who elect to take a particular course. We aim to have a margin of error of less than 5% for each school. All students within a sampled classroom were then included in the survey sample. Parents and guardians for all sampled students were mailed an opt-out form. The parents had the option to request that their student not be given the survey. Students themselves could also choose not to take the survey or could choose to discontinue taking the survey at any time.

NUMBER OF RESPONDENTS				
2017	Number Sampled <sup>i</sup>	Number Completed	Response Rate	Number of Usable Responses
	3,056	2,218	73%	2,058

<sup>i</sup>This number includes those in randomly sampled classrooms and all students enrolled in alternative programs

### Data Processing

Once all of the results were received they were downloaded into Excel. APCYF contracted with an external vendor, Aileron, to provide quality assessment services. This included conducting a parallel consistency check to identify records that should be removed. The criteria to remove a record from the final results included factoring in the following criteria:

- was more than 75% of the survey incomplete
- were there more than 3 inconsistencies in responses (e.g. the student was 15 years old but said they first drank at 18)
- the student indicated on the two honesty questions that s/he did not tell the truth
- results that flagged for 2 inconsistencies were further scrutinized for possible inclusion or exclusion

Results were compared to create a final clean file for use in analysis. One hundred and sixty records (7% of responses) were removed due to inconsistencies or containing unusable data.

### Interpreting Results

Caution should be taken when interpreting school-specific data reports. The sampling methodology ensures that the results are representative of the Arlington community as whole. The sampling framework does not ensure that each school will have a standalone, statistically valid report. Information provided within is intended as a conversation starter and descriptive snapshot of each school community. Any question that had fewer than 20 events reported was either not included or, when possible, rolled into a school-wide average. This is done in order to ensure that we uphold student trust and maintain their anonymity.

Additional information about the survey and the overall findings can be found online at: <https://apcyf.arlingtonva.us/youth-risk-behavior-survey-2017-results/>

<b>FAMILY, HOME, COMMUNITY, SCHOOL</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Lives with both parents	89	74	81	62
Parent graduated from college	93	76	94	63
Gets mostly A's and B's in school	95	90	93	82
Often or very often felt stressed by school	52	48	71	70
After high school most likely to attend a 4 year college, community college or technical school	--	85	94	89
Participates in an hour or more of school activities during an average week	79	76	76	69
Feels safe and secure at home (always or most of the time)	93	95	97	93
Feels safe and secure at school (always or most of the time)	91	89	94	91
Feels safe and secure in neighborhood (always or most of the time)	93	93	97	93
Adults listen to what I have to say (agree or strongly agree)	70	59	85	58
Would talk to family member about serious concern <sup>ii</sup>	75	78	74	62
Would talk to trusted adult about serious concern <sup>ii</sup>	68	59	54	51
Another student made unwelcome sexual comment, joke or gesture on school property, past 12 months	--	40	38	31

All percentages are calculated from valid cases (missing responses were not included).

<sup>ii</sup>6th graders were asked about serious concern but did not include serious concern about sex.

<b>BULLYING</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Victim of bullying at school, past year	36	26	--	15

All percentages are calculated from valid cases (missing responses were not included).

<b>MENTAL HEALTH</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Felt sad or hopeless, past year	30	19	25	34

All percentages are calculated from valid cases (missing responses were not included).

<b>SUBSTANCE USE</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Drank alcohol, past 30 days	--	2	30	26
Somewhat or very easy to get alcohol	--	37	65	63
Ever use marijuana	--	3	40	31

All percentages are calculated from valid cases (missing responses were not included).

<b>PHYSICAL HEALTH</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Had breakfast on 5 or more days, past week	93	80	61	60
Went hungry because there was not enough food in the home (sometimes-always), past month	--	9	--	16
Physically active for at least 60 minutes, 7 days past week	43	34	--	19
Played on 1 or more sports team during past year	78	72	59	59
Watched 2 or more hours of TV on average school day	44	54	69	67
Played video games for 2 or more hours on average school day	30	32	33	33
Spent 2 or more hours per day connecting socially with friends on electronic device on average school day	--	36	63	64
Had regular dental exam during the past year	93	82	88	78
Had regular physical exam with doctor or health care provider during the past year	81	78	90	77
Slept 8 or more hours on an average school night	80	64	25	26

All percentages are calculated from valid cases (missing responses were not included).

<b>SEXUAL HEALTH</b>				
<b>(VALUES ARE PERCENTAGES)</b>				
<b>QUESTION DESCRIPTIONS</b>	<b>H.B. MS</b>	<b>APS MS</b>	<b>H.B. HS</b>	<b>APS HS</b>
Ever had sexual intercourse	--	5	27	33
Been taught in school about where to get sexual health services	--	59	69	71

All percentages are calculated from valid cases (missing responses were not included).
