

Shirlington Blvd & Four Mile Run Dr

BEFORE TREATMENT

Safety Issue: The intersection of Shirlington Blvd & Four Mile Run Drive is an area where modes mix given nearby bus stops and trail connections. It is on Arlington's [high injury network](#) and a location identified through an upcoming repave on S Four Mile Run Dr.

Project Description: Changes to enhance safety for pedestrians and bicycles including: (1) restricting right turns on red, (2) adding a curb extension to shorten the crossing over Four Mile Run Dr, and (3) adding [leading pedestrian intervals](#) over Shirlington Blvd which allows someone to begin crossing an intersection before the vehicles have a green light. The leading pedestrian interval gives the pedestrian or bike a head start to increase their visibility in the crosswalk before vehicles have priority to turn.

Completed: July 2021
