

Wilson Blvd & N. Fillmore Street + Wilson Blvd & N. Barton Street

Wilson Blvd & North Fillmore Street

Safety Issue: The project was identified as part of a holistic evaluation of bike boxes on nearby [Vision Zero high-injury network](#) corridors.

Project Description: This project installed bike lane markings through both intersections, added a two-stage bike turn box to the northwest corner of each intersection to create a designated path and space for people on bikes making left turns, and added "no right turns on red" signage to reduce turning conflicts. [View this video on how to use a two-stage turn box](#) if you have not used one before!

Completed: November 2021
