

# 36<sup>th</sup> St S & S Abingdon St

## BEFORE TREATMENT

**Safety Issue:** This project was identified through community-reported concerns at the crosswalk across 36<sup>th</sup> St S. County staff coordinated with the Fairlington Civic Association using funds available through local developer contributions.

**Project Description:** The project added an extension to the north curb to build out the existing pavement markings on the northwest side of the intersection. These changes permanently reduced the crosswalk distance and reduced the vehicle turning radius. The project also added a centerline buffer to reduce the vehicle lane widths, a new ADA-compliant curb ramp at the southern curb, and bike lane skips across the intersection to enhance awareness of the bike lane.

**Completed:** December 2021

## AFTER TREATMENT
