

N Ohio St & 18th St N

BEFORE PROJECT

Safety Issue: This crossing location at N Ohio St & 18th St N was identified by the Arlington Public Schools New School Working Group because it is within the neighborhood walk zone and on a main walking and biking route to the new Cardinal Elementary School. There was no marked crosswalk at the intersection.

Project Description: County staff installed a midblock crossing over N Ohio St and extended the median into the crosswalk with markings. Additionally, staff added marked curb extensions to ensure visibility of pedestrians and bicyclists waiting to use the crosswalk and marked the existing bike lanes across the intersection to ensure awareness and continuity of the bike lane across the intersection. The new crosswalk will provide better access to Cardinal Elementary School, Swanson Middle School, and the Westover Shopping Center all areas of high pedestrian and bike activity.

Completed: September 2021
