

Yorktown Blvd & George Mason Dr

BEFORE TREATMENT

Safety Issue: Identified through the [Bus Stop Accessibility Improvements](#) program and revisiting a safety issue identified in 2016.

Project Description: This project made permanent elements of the tactical safety improvements implemented at the intersection, provided new curb extensions and sidewalk improvements along the west side of the intersection, and added ADA-compliant curb ramps and transit stops. These changes will improve pedestrian accessibility to transit, reduce crossing distances, and increase user visibility for people walking, biking and driving.

Completed: Summer 2022
