Arlington County, Virginia

HALRB Meeting November 19, 2025, CoA 25-08

2320 N. Edgewood St.: Request to install an EV charger.

CERTIFICATE OF APPROPRIATENESS REQUEST
2320 N. Edgewood Street, Maywood Local Historic District

Request

The applicant is requesting to install a ChargePoint HomeFlex Level 2 EV Charger on the south side of the house adjacent to the driveway. The charger would be installed between the basement window and the bay window below the existing telco box. Dimensions are 11.19" x 7.06" x 7.07" with a 23' charging cable. Electrical power to the unit would run through the basement and would not be visible from the exterior. The unit would be obscured from the street as a result of the protruding bay window.

Following discussion with licensed electrician, a 240V NEMA 14-50R outlet would also be placed outside next to the charging unit to plug the charging unit in. The weather proof 240V outlet is Leviton EVCVM-50, with dimensions 7.5" x 5.5" x 3.5".

Photos

Location proposed for EV charger on South side of residence, left side of bay window away from street and sidewalk.

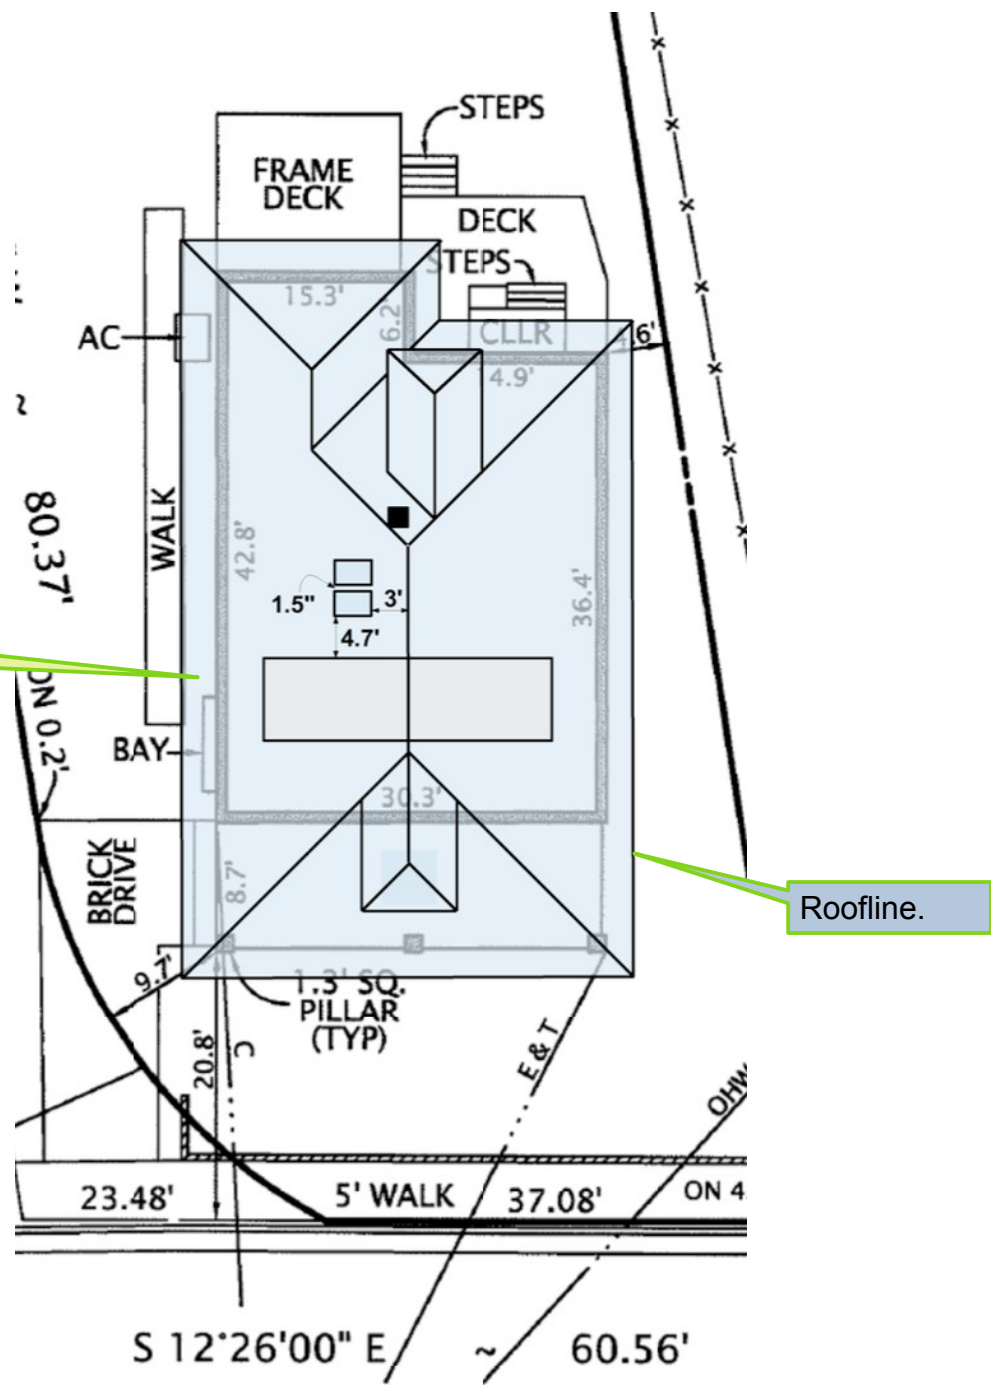

South side of residence looking towards street and sidewalk past bay window. Location of proposed charger on side of house near driveway.
