## Choose the right package for your event!

### Size of the Party

Base sound systems (Bronze and Silver) will easily cover smaller events with 20-50 people, providing clear audio for background music and speeches. Events with 50-150 guests might consider premium sound, especially in loud or dynamic environments and music-heavy events. Events with over 150 guests should require a premium sound system (Gold) to deliver full-range sound and deep bass.

### Indoor or Outdoor?

With indoor locations, sound is reverberated within walls which requires fewer speakers, but premium sound should be considered in indoor environments with high ceilings or large rooms. For outdoor locations, premium sound is essential for music-focused events to provide deeper bass and richer audio that won't get lost in open spaces.

### When a Premium Sound System (Gold Package) is Needed

If your event is large, outdoors or heavily reliant on music with deep bass (such as live DJ performances or dance parties), a premium package is recommended. Additionally, if your event involves speeches or performances in a noisy or open space, premium sound ensures every word and note is delivered clearly to your audience. Beyond the sound system, the Gold Package also includes an **experienced, professional DJ** (accompanying the student DJ) capable of emceeing, responding to complex situations and ensuring your event runs as smooth as possible.

*All prices are for a four-hour rental. Additional hours are noted in listing. All reservations need to be reserved and paid seven days prior to the scheduled event.*

## Consider this when choosing between movie screen rental options

### Front or Rear Projection

Front projection can provide the largest possible indoor screen experience. Consider that the projector will need to be placed at minimum 10 feet in front of the screen, therefore it could potentially block the view of the audience or interrupt the experience if someone walks in front of the screen.

A rear projection will eliminate the issues above, but sacrifices screen size. The rear projection screen otherwise provides a higher projection quality and more professional experience.

### Indoor or Outdoor?

If you have a large, outdoor group, the inflatable screen is the clear winner. Keep in mind the screen uses a blower to stay inflated throughout the event. The provided sound system compensates for the noise, but there is a low, minimum constant decibel level.

*All prices are for a four-hour rental. Additional hours are noted in listing. All reservations need to be reserved and paid seven days prior to the scheduled event.*

# CHOOSE YOUR ADD ONS

Once you've selected your DJ service or Movie Rental, select additional needs from the following options. Add ons can only be rented in combination with other DJ equipment and services.
