Introduction

The 2026 Commercial Guidebook provides insight into Arlington County's commercial real estate assessment valuations for ad valorem purposes. Arlington County's Department of Real Estate Assessments (DREA) values all real commercial property annually as of January 1 and conducts market analysis to aid in the determination of these assessed values. Each year, as a part of that research, actual income, and expense (I&E) information is collected from various commercial property owners and analyzed to determine typical net operating incomes. This information is used, along with physical property inspections and market research, to produce our commercial guidelines for rental rates, expenses, vacancy rates, and capitalization rates. A market sales analysis is also conducted each year to determine capitalization rates. These guidelines are utilized when determining values based on the income approach to valuation. These guidelines are provided as a summary of the commercial market information with sources that we have reviewed and analyzed for the current assessment year.

The 2026 total commercial tax base (to include office, hotels, apartments, general commercial and new construction) decreased by 1.5% to \$40.4 billion, down from \$41.0 billion in 2025. The commercial tax base represents 43% of the total 2026 real estate tax base.

The largest change in commercial assessment value was in office properties, which decreased by 19%, as vacancy issues continue to be a primary driver for the loss in value. Arlington's robust apartment market continued with increased rental rates and strong occupancy numbers even while adding new units to the inventory in 2025, leading to 6.2% growth for multi-family properties over the prior year. General commercial properties increased by 3.7% & hotels decreased by 3.8%, due in some part to a few hospitality properties being redeveloped as multi-family use.

Approaches to Value

Sales Comparison Approach – The sales comparison approach estimates a property's value by comparing the prices of similar properties that sold during the same period. It also considers the circumstances of each sale to understand whether the price reflects normal market conditions. The sales comparison approach focuses on similarities and differences that affect value which may include differences in property rights, financing terms of the transaction, conditions of the sale, overall market conditions, locational influences, physical characteristics and the condition or effective age of the property. Approved density and development rights are also considered with this approach. Examples of considerations that may be taken into account when analyzing a transaction are:

- A property may have sold for more or less than market value based on the urgency to purchase or sell.
- Overall market conditions may have affected the sales price, which may differ from the prior year.
- Changes to size, quality, condition, improvements/additions to properties may have affected the sales price.
- The location of a property, including zoning or development rights, may have affected the sales price.

Commercial assessments are based on sales that occurred within Arlington County during the analysis period which runs from January 1st to December 31st of the year leading up to the January 1st assessment.

Cost Approach – The cost approach is the total cost, at the current rate of materials and labor, to replace the improvements of a property with similar physical characteristics. If the improvements are not new, the appraiser must estimate how much value has been lost due to wear and tear and adjust for this "depreciation," by deducting it from the replacement costs. The cost approach can vary from year to year based on the cost of labor and materials changing. The depreciated cost of the improvements, plus the value of the land, make up the total property value under this approach.

The cost approach may be utilized when valuing properties to ensure equitable assessments where income or sales indicators are not a reliable source to determine market value, or do not reflect the current market conditions.

The cost approach may be used to value multiple property types such as retirement facilities/nursing homes, vehicle dealerships, properties under construction, and other property types or circumstances that require this approach to determine fair market value. Examples of circumstances where the cost approach may be used include:

- when a property is 100% vacant as the income approach becomes unreliable because there is no actual income stream to capitalize, or
- when a property is slated for redevelopment/County Board approved for adaptive reuse.

Income Capitalization Approach – The income approach estimates the value of an income producing property based on the potential income a property can generate if fully leased. Examples of income producing properties are residential apartment buildings, general commercial retail strips, hotels, and office buildings. In applying the income approach, the assessor evaluates typical operating expenses, including taxes, insurance, and maintenance costs, as well as the market-supported return an investor would anticipate. The resulting net operating income, when capitalized at an appropriate capitalization rate, forms the basis for the assessed value. Actual income from each property is considered with market data from other income producing properties when utilizing the income approach to value.

The Income Capitalization Approach is generally applied when:

- The property is income-producing, such as apartments, office buildings, retail centers, or hotels.
- There is sufficient, reliable market income and expense data.
- The property is operating at or near stabilized occupancy or stabilization can be reasonably estimated.

Capitalization Rate Study Methodology

Each year, market analysis and research are conducted to determine capitalization rates, which are derived from arms-length market sales. Actual net operating incomes reported on income and expense (I&E) surveys submitted by property owners of commercial buildings in Arlington County are also reviewed and analyzed to determine market capitalization rates. In addition, surveys and reports of capitalization rates from commercial real estate publications are reviewed to support the analysis.

The indicated base capitalization rates are determined for each market sale by dividing the net operating income (less real estate taxes) that was achieved in the prior calendar year in which the property sold, by the sales price achieved. Properties that sold, and their indicated base capitalization rates, are analyzed to determine base capitalization rates for commercial property values for the current tax year. The appropriate effective tax rate is added (loaded) to the appropriate base capitalization rate used to value each commercial property. The loaded capitalization rate is then applied to the net operating income, which produces an estimate of fair market value.

Non-arm's length sales, or sales without an adequate history of reported income and expenses, are not included in the capitalization rate study.

Income & Expense Information

DREA analyzed market data and actual I&E information reported by commercial property owners from within Arlington County for the 2026 guidelines. I&E information includes operating information such as rental income, vacancy,

concessions, operating expenses, lease information, and parking income. I&E surveys utilized for the 2026 Guidelines provided information from January 1, 2024 – December 31, 2024.

Some I&E information was excluded from the analysis. Reasons for this include:

- Partial year expenses or income were reported on the I&E survey.
- The property experienced high vacancy, was totally vacant or was vacant for renovations.
- The reported expenses appeared to include non-operating expenses, such as capital improvements.
- A tenant paid expenses directly.
- The total expenses, whether high or low, were extreme outliers.

Mixed Use Properties

Mixed use properties are properties that contain multiple commercial property types within one building, such as an apartment with ground floor retail. DREA values each mixed use property by isolating each component of the building and valuing it separately with respect to the individual property type, such as valuing the ground floor retail separately from the apartment building in which it resides. Each component is valued with their respective property class, guidelines, and capitalization rates.

Business Improvement Districts

Business Improvement Districts (BID) are designated boundaries within Arlington County in which properties are levied a special tax rate to fund improvements and enhancements in that area. The first BID to be designated was in Rosslyn in 2002. A second BID in Crystal City was designated in 2006 (re-named to National Landing in 2020), and a third in Ballston was established in January 2011. The current BID tax rates are provided below:

[Ballston BID](#) (BID Tax Rate - \$.045)

[National Landing BID](#) (BID Tax Rate - \$.043)

[Rosslyn BID](#) (BID Tax Rate - \$.078)

Tax rates are expressed in dollars, per one hundred dollars of assessed value.

Apartment Summary

Apartments are multi-family, residential rental properties containing five or more living units that are assessed as a single entity. Apartment properties may also include multi-use portions, such as ground floor retail or office space, creating a mixed-use valuation. There are approximately 500 taxable multi-family buildings and vacant land parcels in Arlington County. Multi-family residential property assessments increased 6.2% in assessed value over 2025. The total 2026 assessed value, including new construction of \$57 million, is \$24.4 billion, up from \$22.9 billion in 2025. This represents 60.3% of the commercial real estate tax base and 25.9% of the total real estate tax base.

Apartment Types

Multi-family residential properties are classified and valued as either market rate housing, committed affordable rate housing, or mixed rental rate housing (market & affordable). All apartment properties fall into one of the three following property classes:

- Garden: 1 to 3 story multi-family dwellings
- Mid-rise: 4 to 8 story multi-family dwellings
- High-rise: 9+ stories multi-family dwellings

PARKING

Garage	\$50 - \$150 per month
Non garage/carport	\$25 - \$75 per month

GARDEN APARTMENT MARKET APPROACH

Garden Apartments containing 20 or less units, where the income may not support the market approach to value as defined by recent Arlington County sales, are valued using the following per unit rates:

Efficiency = \$148,000 per unit

1-BR = \$180,000 per unit

TRANSITION PROPERTIES

An interim value is used to value the improvements of properties when the "highest and best use" is redevelopment.

\$1,000 per unit

MARKET APARTMENT LAND

Mid-rise and high-rise properties that are more than a half-mile walk away from a Metro station are valued at \$65,000 per rental unit.

Mid-rise and high-rise properties within a half-mile walk from a Metro station are valued at \$78,000 per rental unit.

Garden properties are valued using a per-square foot rate.

MINIMUM VALUE PER UNIT

In some cases, a market approach was used to value garden properties containing 20 units or less where the income approach does not support the value of the land. The minimum value for units containing one or more bedrooms is \$180,000/unit. The minimum value for efficiency or studio units is \$148,000/unit. A graduated schedule for properties containing 21 – 30 units where the minimum value decreases based on unit count is provided below.

2026 Apartment Guidelines

Per-unit valuation for projects containing 20 or fewer units (with one or more bedrooms)

Units	Total	Minimum Per Unit
4	720,000	180,000

29	3,899,340	134,460
30	3,985,788	132,860

2026 Committed Affordable Apartment Guidelines

RENTS

Arlington County rental rates by percent of median income for affordable rental units:

Unit Size	80%	60%	50%	40%
Efficiency	\$2,296	\$1,722	\$1,435	\$1,148
1	\$2,460	\$1,845	\$1,537	\$1,230
2	\$2,952	\$2,214	\$1,845	\$1,476
3	\$3,410	\$2,557	\$2,131	\$1,705
4	\$3,804	\$2,853	\$2,377	\$1,902

The rent schedule reflects quality, amenities, and location (i.e., Metro influence). Committed Affordable Rents are analyzed based on actual rental information collected from income and expense information submitted and using Arlington County Affordable Rents.

General Commercial Summary

General commercial properties consist of any non-industrial or non-residential real estate of a commercial enterprise (e.g., income-producing, owner-occupied, and raw land). Examples of properties classified as general commercial are retail strips, regional malls, storage facilities, warehouses, senior living facilities, service and gas stations, convenience stores, neighborhood centers, restaurants, grocery stores, commercial parking garages, parking lots, banks, fast food, small office (\leq 30,000 sq. ft.), theaters, auto dealerships, golf courses, and commercial condominium units.

General commercial properties, including new construction, increased 3.7% in assessed value as compared to 2025 with a total 2026 assessed value of \$4.5 billion. This represents 11.2% of the commercial real estate tax base and 4.8% of the total real estate tax base. There are 1,809 properties that fall under the General Commercial category; 1,022 properties are taxable, and 787 are tax exempt.

2026 General Commercial Guidelines

FACTORS FOR PROPERTIES VALUED USING THE INCOME APPROACH

Category (PCC)	Income	Vacancy/ Collection	Expenses
Retail Strip/Commercial (211)	\$22.00 - \$83.00	7%	15%
Restaurant (212)	\$26.00 - \$78.00	14%	14%
Neighborhood Center (214)	\$24.00 - \$62.00	10%	19%
Mixed Office/Commercial (219)	\$31.00 - \$66.00	10%	22%
Warehouse (251)	\$16.00 - \$52.00	2%	12%
Self-Storage Warehouse (252)	\$30.00 - \$42.00	6%	15%
Commercial Condo (290)	\$25.00 - \$72.00	8%	10% - 42%
Commercial Condo (290) North Medical	\$22.00 - \$62.00	5%	27% - 34%
Commercial Condo (290) South Medical	\$25.00 - \$61.00	5%	34%
Small Office/Gen Comm (213)	\$25.00 - \$52.00	6%	\$8 - \$14

Vacancy & Collection includes vacancy, rent loss, & rent concessions.

CAPITALIZATION RATES FOR GENERAL COMMERCIAL PROPERTIES

Category (PCC)	Rate
General Commercial Properties (PCC 211 & 212)	7.00%
General Commercial Properties (includes PCCs 214 and 219)	7.15%
General Commercial Properties	7.45%
General Commercial Properties	7.10%
Commercial Condos (excluding North and South Medical)	6.80%
Commercial Condos/North Medical	6.80%
Commercial Condos/South Medical	6.80%

CAPITALIZATION RATES FOR SMALL OFFICE (< 30,001 sq. ft.)

Effective Age	Rate
1979 or Earlier	10.30%
1980 to 1989	9.80%
1990 to 1999	9.30%
2000 to Present	8.80%

Office Summary

Commercial office buildings are used exclusively for business or professional purposes. Office space provides environments conducive to the performance of management and administrative activities such as accounting, marketing, information processing, consulting, human resources management, financial and insurance services, educational and medical services, and other professional services. There are approximately 179 taxable office properties within Arlington County.

Arlington office property assessments experienced an overall decrease of 19.0% in assessed value with no new construction value added for the year. The total 2026 assessed value is \$9.1 billion compared to \$11.2 billion in 2025. This represents 22.5% of the commercial real estate tax base and 9.7% of the total real estate tax base.

2026 Office Guidelines

RENTS

Submarket	NBHD #	Min	Max	Average Sub-Market Rent
Rosslyn	910000	\$29.00	\$84.50	\$48.25
Courthouse	920000	\$22.00	\$62.00	\$45.00
Va Square/ Clarendon	930000 / 940000	\$25.75	\$64.00	\$46.50
Ballston	950000	\$27.50	\$58.00	\$45.00
Crystal City/ National Landing	960000	\$28.00	\$56.75	\$43.00
Outside Metro	970000 / 980000	\$35.25	\$43.00	\$39.00

(NBHD – Neighborhood)

Market rent is the rental rate that tenants are currently willing to pay at comparable properties in comparable markets. The rental rate is determined by reviewing the income for office properties in prior years, the income to be generated by existing leases, and market data available. The actual income received is usually a blend between the older existing and recent lease rates for the property. The rental rate may not be the same as the most recent leases in a multi-tenanted building, as all space is not leased at the same time, and the older leases may be at a different rate (higher or lower).

The market rent ranges, and submarket averages were determined by analyzing information provided on the I&E surveys and rent rolls as well as market data available.

VACANCY & COLLECTION LOSS

		(0% to 8%)	(>8% to 13%)	(>13% to 18%)	(>18% to 23%)	(>23% to 28%)	Excess of Vac Threshold
Rosslyn	910000	8%	13%	18%	23%	28%	> 28%
Courthouse	920000	8%	13%	18%	23%	28%	> 28%
Va Square/ Clarendon	930000 / 940000	8%	13%	18%	23%	28%	> 28%
Ballston	950000	8%	13%	18%	23%	28%	> 28%
Crystal City/ National Landing	960000	8%	13%	18%	23%	28%	> 28%
Outside Metro	970000 / 980000	8%	13%	18%	23%	28%	> 28%

The Department analyzed I&E surveys that provided actual vacancy rate information from the 2024 operating year. Arlington’s overall vacancy rate is 24%. Excess vacancy that is greater than the submarket threshold is considered as an after capitalization deduction on a case by case basis.

CONCESSIONS

Free Rent concessions of 9% will be considered on gross base rents on all office properties. Rent Loss, Tenant Improvements and Leasing Commissions will not be considered as expenses/concessions.

DISCOUNT FOR LEASE-UP

Rent Loss will be considered for 1 year. Tenant Improvements (TI) are \$90 per square foot for renewal leases < \$45 and \$115 for new buildings or buildings with renewal leases >= \$45 psf. Leasing Commissions are calculated at 5yrs @ 6%.

PARKING

The average annual income received per parking space for all submarkets was \$1,200.

Parking income information submitted on the I&E surveys was used to determine the average parking rent per space. The calculations are based on the parking income submitted, divided by the number of parking spaces.

EXPENSES

The average expenses per square foot for all submarkets was \$9.70.

Expenses reflect the cost to operate the property and do not include capital expenses, debt service, ground rent, leasing commissions, reserves, or real estate taxes. The expense rate used for the valuation of each property is developed by reviewing the actual reported expenses in prior years and the expenses of comparable properties.

CAPITALIZATION RATES

Due to the limited number of sales in 2025, DREA considered prior year sales to evaluate possible trends, available market data and commercial real estate publications available.

Hotel Summary

A hotel is a facility that serves the needs of travelers, offers lodging accommodation and parking, and may provide a wide range of other services and amenities (e.g. restaurants, convention facilities, meeting and/or banquet rooms, recreational facilities, swimming pools, commercial shops). Airbnb and VRBO properties are not included in this property type and are valued as residential properties.

Hotel properties, the smallest sector within the commercial tax base, decreased in assessed value by 3.8% from 2025 (no new construction value was added for the year). The total 2026 assessed value is \$2.13 billion compared to \$2.22 billion in 2025. Hotel properties represent 5.3% of the commercial real estate tax base and 2.3% of the total real estate tax base.

Demand for lodging in Arlington County in 2025 leveled off after four years of a return to pre-pandemic stability, with occupancy and average daily rate dropping slightly from the prior year. Per Arlington County's 2025 year-end Key Data/Amadeus Report:

- The overall occupancy rate for 2025 was down 6% from 2024.
- The average daily rate (ADR) for 2025 was down 1% from 2024.
- The revenue per available room (RevPar) for 2025 was down 7% from 2024.

As of Jan. 1, 2026, there are 37 hotels in Arlington County. DREA identifies 18 as full-service, 5 as limited-service, 6 as select service, 5 as residence suites, and 3 as lodging hotels. For the 2026 real property assessment, DREA relied upon the data received from I&E surveys that reported information from the 2024 operating year.

Hotel Types:

- Full-Service Hotels offer the widest range of services, including on-site restaurants, room service, meeting space, and amenities such as fitness centers and pool. These hotels commonly serve business travelers and groups.
- Selective Service Hotels provide some amenities but fewer services than full-service hotels. Food options are limited, meeting space is smaller, and certain amenities like room service or pools may not be available.
- Limited-Service Hotels typically offer breakfast only, with no restaurant or bar. Amenities are minimal, and these properties usually do not have meeting space.
- Residence Suites are designed for longer stays, these hotels offer rooms with kitchens or kitchenettes and separate living and sleeping areas.
- Lodging properties provide basic accommodation with little to no amenities and no food or beverage service. These properties are marketed primarily as lower-cost options.

When determining the net operating income of a property, revenues generated from room and meeting space rentals, food and beverage sales, parking services, telephone and internet usage, lobby sales, dry cleaning, equipment rental, and other sources are considered with the expenses associated to operate the property annually. Expenses associated with ownership such as amortization payments (principle and/or interest), ground lease payments, depreciation, income tax, or capital improvements are not considered expenses when determining the indicated net operating income. The net operating income is capitalized to indicate total value. Business tangible personal property assessed value is provided by the Commissioner of the Revenue and is subtracted from the subject property's capitalized value to indicate a property's final real property assessed value.
