

Arlington Transit Real Time Challenges Update

3 Parts of Real-Time Transit:
Vehicle Positions, Trip Updates & Alerts

Vehicle Positions

- The location of the buses gets published to 3rd party applications
- If you see a bus tracking on a map, it is accurate
- ART has a website to track buses

<https://realtime.arlingtontransit.com/home>

Apple Maps

Trip Updates

- Delays, cancellations, and changed routes will be published to 3rd party applications
- Currently ART is developing software that will publish this information

Alerts

- Messages from the operations team describing a disruption on the transit network
- ART currently has an alert system for this purpose (sign up on ART's website)
