

Collisions Before and After: Little Falls Rd and Old Dominion Dr

In November 2021, the County completed the addition of turn restrictions, to reduce vehicle angle crashes by restricting left turns and adding a physical barrier to prevent the left turn movements. **The average number of collisions per year at the intersection decreased from 11.4 in 2016-2021 (before the project) to zero in 2021-2023 (after the project).**

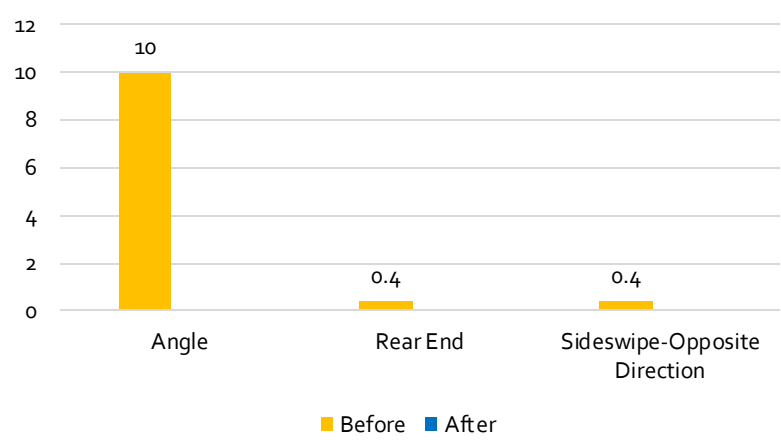

Key Findings:
Left turn restrictions have eliminated the left turn conflict

Next Step:
Monitor for crashes or issues

Collision Characteristics – Average per Year

Collision Types – Average per Year

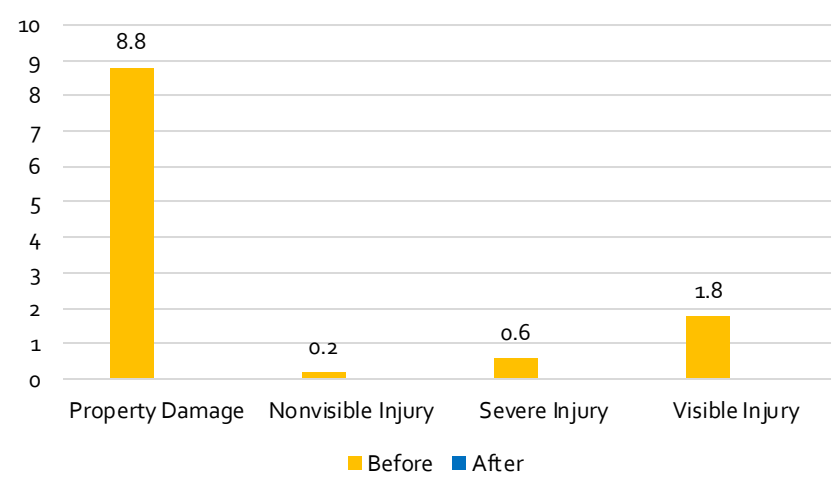

Tools Implemented

Inform road users of regulations and warnings to facilitate safe flow of all road users.

Collision Severity – Average per Year

Total Average Crashes per Year
