## **Arlington County Municipal Separate Storm Sewer System Permit No. VA0088579**

MS4 Program Plan
2021-2026 Permit Cycle
Submitted June 2022
Updated September 2023
Updated September 2024

## **INTRODUCTION**

This Municipal Separate Storm Sewer System (MS4) Program Plan has been developed by Arlington County in compliance with its VSMP MS4 Permit (VA0088579) issued by the Virginia Department of Environmental Quality (DEQ).

The Program Plan requirements of the MS4 Permit, which will be implemented in the manner described in this plan, have been determined to reduce the discharge of pollutants to the "maximum extent practicable" (MEP) and demonstrate adequate progress using an adaptive iterative approach to achieve compliance.

This Plan is a dynamic document that will be evaluated annually and updated as necessary to reflect any program modifications or changes. The County reserves full discretion to modify this plan in accordance with applicable laws (including Virginia Code Titles 15.2 and 62.1), applicable regulations, and the terms of the MS4 Permit. Appendices provide additional detailed information.

The County looks forward to a continued successful and collaborative relationship with DEQ as Arlington continues to move forward with its MS4 Program and achieving the Chesapeake Bay TMDL 40% reduction of pollutants of concern milestone by the end of this permit in 2026.

For additional information about Arlington County' stormwater management program, please visit the County's website: <a href="https://www.arlingtonva.us/Government/Programs/Sustainability-and-Environment/Stormwater">https://www.arlingtonva.us/Government/Programs/Sustainability-and-Environment/Stormwater</a>.

## **List of Appendices for MS4 Program Plan**

Appendix A - List of County Acronyms

Appendix B - Retrofit Projects List

Appendix C - Roadways Pollution Prevention Protocols

<u>Appendix D - Outfall Identification Standard Operating Procedure</u>

<u>Appendix E - Arlington County Dry Weather Screening Plan</u>

Appendix F - Arlington County Wet Weather Monitoring Plan

<u>Appendix G – Updated Chesapeake Bay TMDL Action Plan</u>

<u>Appendix H – Updated Bacteria TMDL Action Plan</u>

Appendix I – Updated PCB TMDL Plan

	PART I - AUTHORIZATION, EFFLUENT LIMITATIONS				
	AND MONITORING REQUIREMENTS				
	A. Discharges Authorized Under This State Permit				
	A.1. Authorized Discharges				
1.A.1.a	This state permit authorizes the discharge of stormwater from				
	all existing and new municipal separate stormwater point				
	source discharges to surface waters from the Municipal				
	Separate Storm Sewer System (MS4) owned or operated by the				
	County of Arlington, Virginia.				
1.A.1.b	The following discharges, whether discharged separately or				
	commingled with municipal stormwater, areal so authorized by				
	this permit for discharge through the MS4:				
1.A.1.b.1	Non-stormwater discharges and stormwater discharges				
	associated with industrial activity (defined at 9VAC25-31-10)			<b>b b b b</b>	
	that are authorized by a separate Virginia Pollutant Discharge				
1.0.1.5.3	Elimination System (VPDES) permit;				
1.A.1.b.2	Discharges from construction activities that are regulated				
	under the Virginia Stormwater Management Program (VSMP) (9VAC25-870-10 et seq.) and authorized by a separate VSMP				
	authority permit or state permit; and				
1.A.1.b.3	The following non-stormwater discharges unless the State				
1.7.1.1.5.5	Water Control Board, or the permittee determines the				
	discharge to be a significant source of pollutants to surface				
	waters:				
	a) water line flushing, managed in a manner to avoid an				
	instream impact;				
	b) landscape irrigation				
	c) diverted stream flows				
	d) rising ground waters;				
	e) uncontaminated ground water infiltration (as defined				
	at 40 CFR Part 35.2005(20));				
	<ul><li>f) uncontaminated pumped ground water;</li><li>g) discharges from potable water sources;</li></ul>				
	h) foundation drains;				
	i) air conditioning condensation;				
	j) irrigation water;				
	k) springs;				
	water from crawl space pumps;				
	m) footing drains;				
	n) lawn watering;				
	o) individual residential car washing;				
	p) flows from riparian habitats and wetlands;				
	q) dechlorinated swimming pool discharges;				
	r) street wash water;				
	s) discharges or flows from emergency firefighting				
	activities;

	<ul> <li>other activities generating discharges identified by the Department as not requiring VPDES authorization; and,</li> </ul>							
	<ul> <li>v) discharges from non-commercial fundraising car washes using only biodegradable, phosphate-free, water-based cleaners.</li> </ul>							
1.A.1.b.4	Materials from a spill are not authorized unless the discharge of material resulting from a spill is necessary to prevent loss of life, personal injury, or severe property damage. The permittee shall take, or require the responsible party to take, all reasonable steps to minimize or prevent any adverse effect on							
	human health or the environment in accordance with the permittee's program under Part I.B.6 (Spill Prevention and Response). This permit does not transfer liability for a spill itself from the party(ies) responsible for the spill to the permittee			•	•	<b>&gt;</b>	<b>&gt;</b>	
	nor relieve the party(ies) responsible for a spill from the reporting requirements of 40 CFR Part 117 and 40 CFR Part 302. The permittee is responsible for any reporting requirement listed under Part II.G of this permit.							
	1.A.2. Permittee Responsibilities							
	The permittee shall develop, implement, and enforce a MS4 program designed to reduce the discharge of pollutants from the large MS4 to the maximum extent practicable (MEP) in accordance with this permit, to protect water quality, and to satisfy the appropriate water quality requirements of the State Water Control Law and its attendant regulations. The permittee shall utilize the legal authority provided by the laws and regulations of the Commonwealth of Virginia to control discharges to and from the MS4. This legal authority may be a combination of statute, ordinance, permit, policy, specific contract language, order, or inter-jurisdictional agreements. The MS4 program shall include the program requirements described in Part I of this permit. For the purposes of this permit term, implementation of MS4 program requirements in Part I and the Chesapeake Bay and local TMDL requirements in Part I.E (as applicable) consistent with the provisions of an iterative MS4 program required pursuant to this individual permit constitutes compliance with the standard of reducing pollutants to the maximum extent practicable, provides adequate progress in meeting water quality standards, and satisfies the appropriate water quality requirements of the State Water Control Law and its attendant regulations.	DES/OSEM	Roles and responsible agencies are listed in this Program Plan under the "Responsible Party" column.	•	•	•		Each annual report shall include a current list of roles and responsibilities.

				1 2			5
	This state permit establishes the specific requirements applicable to the permittee for the term of this permit. The permittee is responsible for compliance with this permit. The permittee shall implement and update the MS4 program plan (as set forth in Part I.B) to ensure compliance with this permit. The Department has determined that implementation of the MS4 program plan, consistent with the conditions in this permit, reduces the discharge of pollutants to the maximum extent practicable. Where wasteloads have been allocated for pollutant(s) of concern in an approved Total Maximum Daily Load (TMDL), the permittee shall implement the TMDL program requirements as set forth in Part I.E of this permit. Compliance with the requirements of this permit shall also constitute adequate progress for this permit term towards complying with the assumptions and requirements of the applicable TMDL wasteload allocations such that the discharge does not cause or contribute to violation of the water quality standards.  The permittee shall clearly define the roles and responsibilities of each of the permittee's departments, divisions or subdivisions in maintaining permit compliance. If the permittee relies on another party to implement portions of the MS4 program plan, both parties shall document the agreement in writing. The agreement shall be retained by the permittee with the MS4 program plan. Roles and responsibilities shall be updated as necessary. Where the permittee relies on another party to implement a portion of this permit, responsibility for compliance with this permit shall remain with the permittee.						
	1.A.3. Legal Authority						
1.A.3	The permittee shall maintain and utilize its legal authority authorized by the Commonwealth of Virginia to control discharges to and from the MS4 in the manner established by the specific requirements of this permit. The legal authority shall enable the permittee to:						
1.A.3.a	Control the contribution of pollutants to the MS4;	DES/OSEM DES/SWB	The Stormwater Management Ordinance (Chapter 60), Erosion and Sediment Control Ordinance (Chapter 57), Utilities Ordinance (Chapter 26), Fire Prevention Code (Chapter 8), Plumbing Code (Chapter 18), and Trash, Recycling, and Care of Premises Ordinance (Chapter 10) provide the authority to control pollutant discharges to the MS4.	<b>&gt;</b> 1	<b>&gt;</b>	<b>&gt;</b>

			The County is in the process of consolidating Chapter 57 and Chapter 60 to align with the new Virginia Erosion and Stormwater Management Act that went into effect on July 1, 2024.				
1.A.3.b	Prohibit illicit discharges to the MS4;	DES/OSEM	The Stormwater Management Ordinance (Chapter 60), Erosion and Sediment Control Ordinance (Chapter 57), Utilities Ordinance (Chapter 26), Fire Prevention Code (Chapter 8), Plumbing Code (Chapter 18), and Trash, Recycling, and Care of Premises Ordinance (Chapter 10) provide the authority to prohibit illicit discharges and connections, as well as illegal dumping.  Arlington County Code Chapter 26, section 26.7 B and C prohibits unauthorized discharges to the storm drain system that may cause an adverse effect on the storm drain system and/or surface waters.	<b>&gt;</b>	•	<b>&gt;</b>	
1.A.3.c	Control the dumping or improper disposal of materials other than stormwater (e.g., industrial and commercial wastes, trash, used motor vehicle fluids, leaf litter, grass clippings, domestic animal wastes, etc.) into the MS4;	DES/OSEM DES/SWB DES/WSS ACFD DPR	The <u>Stormwater Management Ordinance</u> (Chapter 60), <u>Erosion and Sediment Control Ordinance</u> (Chapter 57), <u>Utilities Ordinance</u> (Chapter 26), <u>Fire Prevention Code</u> (Chapter 8), and <u>Trash</u> , <u>Recycling</u> , <u>and Care of Premises Ordinance</u> (Chapter 10) provide the authority to control improper disposal of materials other than stormwater into the MS4.	<b>&gt;</b>	•	<b>&gt;</b>	<b>&gt;</b>
1.A.3.d	Require compliance with conditions in ordinances, permits, contracts, inter-jurisdictional agreements, or orders; and	DES/OSEM DES/ENG DES/DSB DES/SWB CPHD/ISD DPR	The County has the authority to require compliance related to implementing the permit requirements, including but not limited to:  Conditions in County Code (including permits and orders issued through ordinances):  The County has authority as authorized by state law and as stated in local ordinances, including options for escalating enforcement steps as appropriate in the County's exercise of its enforcement discretion as the regulator of covered third party activities. Local enforcement authority includes:  Stormwater Management Ordinance (Chapter 60): see § 60-17. Enforcement, Violations and Penalties.  Erosion and Sediment Control Ordinance (Chapter 57): see § 57-11. Penalties, Injunctions, and Other Legal Actions.	<b>&gt;</b>	•	•

				1 2	3	4	5
			<ul> <li>Utilities Ordinance (Chapter 26): see § 26-7. Storm Sewer System and § 26-10. Penalty</li> <li>Plumbing Code (Chapter 18): § 18-4. Administration and Enforcement.</li> <li>Fire Prevention Code (Chapter 8)</li> <li>Arlington County Code</li> </ul>				
1 / 2 0	Carry out all inspections surveillance, and monitoring	DES/OSEM	Contracts and inter-jurisdictional agreements:  To the extent authorized by state law, the County has authority to enter into and carry out contracts and, in event of breach of any contract by a counterparty, to enforce such contracts according to the provisions thereof and by legal action for breach of contract at the County's discretion.				
1.A.3.e	Carry out all inspections, surveillance, and monitoring procedures necessary to determine compliance and noncompliance with permit conditions including the prohibition on illicit discharges to MS4	DES/OSEM DES/WSS DES/DSG ACFD	The County has authority to conduct inspections/monitoring etc. related to implementing the permit requirements, including but not limited to:  • Stormwater Management Ordinance (Chapter 60): § 60-14. Monitoring and Inspections.  • Erosion and Sediment Control Ordinance (Chapter 57): § 57-9. Monitoring, Reports, and Inspections.  • Utilities Ordinance (Chapter 26): § 26-7 C. Storm Sewer System  • Fire Prevention Code (Chapter 8): § 8.1-9. Investigation.	<b>•</b> •	•	•	
	1.A.4. MS4 Program Resources						
1.A.4	The permittee shall submit to the Department a copy of each fiscal year's budget including its proposed capital and operation and maintenance expenditures necessary to accomplish the activities required by this permit. The permittee shall describe its method of funding the stormwater program with the copy of the fiscal year budget.	DES/OSEM	The County will provide the required budget information and documentation describing how the stormwater management program will be funded each FY as part of each Annual Report.  In 2024, the County moved to funding its Stormwater Management Program through a Stormwater Utility Fee. The utility fee replaced the sanitary district tax that had been in place since 2008.	<b>&gt;</b>	•	<b>&gt;</b>	A copy of the fiscal year's budget including its proposed capital and operation and maintenance expenditures necessary to accomplish the activities required by this state permit shall be submitted with each annual report.
	1.A.5. Permit Maintenance Fees						
1.A.5	Permit maintenance fees shall be paid in accordance with Part XIII of the Virginia Stormwater Permitting Program regulations (4 VAC 50-60-700 et seq.).	DES/OSEM	Permit maintenance fees will be paid as required.	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	A statement regarding payment of the applicable MS4 permit maintenance fee, including check date and check number shall be included with each annual report.
	1.A.6. MS4 Program Plan						

MS4	Permit Requirement	Responsible Party	Program Plan Elements	Due		۱nnu		Specific Reporting Requirements
Action ID				Date	<mark>e</mark> Timeline		line	
				Peri	nit Y	ear		
			İ	1	2 3	3 4	5	1
1.A.6	The permittee shall maintain and implement an MS4 program plan accurately documenting the MS4 Program including all additions, changes and modifications. The MS4 program plan shall contain either by inclusion or reference all documents, activities, and procedures used in order to meet the requirements of this permit. Documents may be incorporated by reference provided the latest revision date is included in the MS4 program plan and all documents are available upon request.  Specific reference shall be made to any ordinance more stringent than the Virginia Stormwater Management Act (§ 62.1-44.15:24 et seq.) and VSMP regulations (9VAC25-870 et seq.), the Virginia Erosion and Sediment Control Law (§ 62.1-44:15:51 et. seq.) and Regulations (9VAC25-840 et seq.) and the Chesapeake Bay Preservation Act (§ 62.1-44.15:67 et seq.) and Chesapeake Bay Preservation Area Designation and Management Regulations (9VAC25-830 et seq.).  The permittee shall submit the updated MS4 program plan that meets the requirements of this permit no later than twelve (12) months after the effective date of this permit. If there are other permit conditions related to the MS4 program plan that have a later specified due date (i.e. 24 months per Part I.B.8.a).6) and Part I.B.8.c).2)) the plan shall be updated accordingly at that time and the most up-to-date version of the MS4 program plan shall be posted on the permittee's website within 30 days of updating the MS4 program plan.  The most recent MS4 program plan shall be posted on the permittee's website. Until such time that the MS4 program plan is updated in accordance with Part I.A.7 of this section below and Part I.B, the permittee shall continue to implement the plan in effect at the time that coverage is issued by this permit.  No later than 12-months after the effective date of this permit,	DES/OSEM DES/OSEM	This document is Arlington County's updated MS4 Program Plan, which has been developed to document the County's MS4 Program as it exists at the end of the 3 <sup>rd</sup> year of this permit cycle.  The MS4 Program Plan is available on the County's website. A link to the MS4 Program Plan can be found in the side box on the right side of the web page.  The County reserves full discretion to modify this plan in accordance with applicable laws (including Virginia Code Titles 15.2 and 62.1), applicable regulations, and the terms of this Permit.	June 30, 2022				Each annual report shall include a webpage address to the permittee's MS4 program and stormwater website.  No later than 12 months after the permit effective date, the permittee shall submit to the Department the stormwater management project planning summary as described in Part I.A.6 above. The summary shall include a prioritized list of the identified projects for consideration of implementation.  Each annual report shall include an updated stormwater management project summary sheet for which implementation or construction occurred during the reporting year.  Each annual report shall include a current web link to the stormwater management project status page(s).
	the permittee shall submit to the Department a summary of potential stormwater management projects to be completed during the term of the permit. Projects addressing stormwater quantity may be included if there is a water quality benefit to the project.  At a minimum, the summary shall provide the following information for each project:  • type of project or BMP;  • number of acres which the BMP treats;  • impervious and pervious acreage treated by the potential project;  • condition of downstream channel;		stormwater management projects to be completed during the term of the permit. Updated planning information is placed on the County's website. The County will continue to maintain and update the project pages.		<b>&gt;</b> 1	<b>&gt;</b>	<b>&gt;</b>

	<ul> <li>estimated cost of implementation.</li> </ul>							
	·							
	An updated planning summary shall be placed on the							
	permittee's website no later than 30 days after it is submitted							
	to the Department. No later than 30-days following funding							
	allocation for project development, the permittee shall identify and summarize the project on the permittee's website. Project							
	statuses shall be updated no later than 30-days following							
	project completion and updated on the website no less than							
	once per year.							
	1.A.7. MS4 Program Review and Updates							
1.A.7	The permittee shall review the current MS4 program and	DES/OSEM	The MS4 Permit Program Plan is reviewed					Provide an update on any MS4 program changes
	program plan annually, in conjunction with the preparation of		annually. The plan is updated accordingly as part of	<b>&gt;</b>	<b></b>		<b>&gt;</b>	and the MS4 program plan in the Annual Report.
	the annual report required under Part I.F of this permit.	250/2051	the annual reporting process.					
1.A.7.a	The MS4 program plan documents actions taken by the permittee to meet MS4 permit requirements. Revisions to the	DES/OSEM						
	MS4 program plan may be made during the term of the permit							
	as part of the iterative process to reduce pollutant loading and							
	protect water quality to the "maximum extent practicable"							
	(MEP). Updates to specific standards and specifications,							
	schedules, operating procedures, ordinances, manuals,							
	checklists and other documents routinely evaluated are							
	authorized under this permit provided that the updates are							
	performed in a manner (i) that is consistent with the conditions							
	of this permit, (ii) that ensure public notice and participation requirements established in this permit are followed, and (iii)							
	that the updates are documented in the annual report							
	described in Part I.F of this report.							
1.A.7.b	MS4 Program Modifications:							
	Any modifications to the MS4 program that are not consistent							
	with the requirements of this permit will require modification							
	of the permit. Replacing, or eliminating without replacement,							
	any ineffective or infeasible strategies, policies, and Best							
	Management Practices (BMPs) specifically identified in this							
	permit with alternate strategies, policies and BMPs may be requested at any time. Such requests shall include the							
	following:			<b>•</b>	<b>&gt;</b>	•	<b>•</b>	
	1) An analysis of how and / or why the BMPs, strategies							
	or policies are ineffective or infeasible including							
	information on whether the BMPs, strategies, or							
	policies are cost prohibitive;							
	<ul><li>2) Expectations on the effectiveness of the replacement</li></ul>							
	BMPs, strategies or policies;							
	Divir 3, strategies of policies,

	<ul> <li>3) An analysis of how the replacement BMPs are expected to achieve the goals of the BMPs to be replaced;</li> <li>4) A schedule for implementing the replacement BMPs, strategies and policies; and</li> <li>5) An analysis of how the replacement strategies and policies are expected to improve the permittee's ability to meet the goals of the strategies and policies being replaced</li> </ul>								
1.A.7.b	MS4 Program Updates Requested by the Department: In a manner and following procedures in accordance with the Virginia Administrative Processes Act, the VSMP regulations and other applicable State laws, statutes and regulations, the Department may request changes to the MS4 Program to assure compliance with the statutory requirements of the Virginia Stormwater Management Act and associated regulations and to:  1) Address impacts on receiving water quality caused by discharges from the MS4; 2) Include more stringent requirements necessary to comply with new State or Federal statutory or regulatory requirements; or 3) Include such other conditions necessary to comply with State or Federal statutory or regulatory requirements:			<b>•</b>	•			•	
	Proposed changes requested by the Department shall be made in writing and set forth the basis for and objective of the modification as well as the proposed time schedule for the permittee to develop and implement the modification. The permittee may propose alternative program modifications and/or time schedules to meet the objective of the requested modification, but any such modifications are at the discretion of the Department.								
	1.B. MS4 PROGRAM IMPLEMENTATION								
	1.B.1 Construction Site Runoff and Post Construction Runoff from Areas of New Development and Development on Prior Developed Lands								
1.B.1.a	The permittee shall implement a local erosion and sediment control program consistent with the Virginia Erosion and Sediment Control Law § 62.1-44.15:51 of the Code of Virginia and Virginia Erosion and Sediment Control Regulations 9VAC25-840 et seq. and a stormwater management program consistent with the Virginia Stormwater Management Act § 62.1-44.15:24	DES/DSB	Since July 1, 2005, the Development Services Bureau of DES has administered the Erosion and Sediment Control Program for Arlington County, including plan review and inspection.	•	•	•	•	•	Each annual report shall contain the number of regulated land disturbing activities approved and the total number of acres disturbed.  Each annual report shall contain the number of land disturbing activity inspections conducted and

MS4	Permit Requirement	Responsible Party	Program Plan Elements	Due		nnua		Specific Reporting Requirements
Action ID				Date Perm			ne	
				1 2				
	of the Code of Virginia and Virginia Stormwater Management Program Regulations 9VAC25-870 et seq.		The Erosion and Sediment Control Ordinance (Chapter 57 of the County Code) requires an erosion and sediment control plan for clearing and grading activities equal to or greater than 2,500 square feet of land disturbance. Erosion and sediment control inspection and enforcement activities are also tracked, along with Virginia Stormwater Management Program permit activities, using a database and reporting application.					the number and type of each enforcement action taken.  Each annual report shall include a list of land disturbing projects that qualify under the "Grandfathering" provision of the VSMP regulations found at 9VAC25-870-48 that receive coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities during the reporting period.  Each annual report shall include a summary of actions taken by the permittee to implement Part I.B.1 a) and b) of this permit.
1.B.1.a.1	The permittee shall require the implementation of appropriate controls to prevent non- stormwater discharges to the MS4, such as wastewater, concrete washout, fuels and oils, and other illicit discharges identified during land disturbing activity inspections. The discharge of non-stormwater discharges other than those identified in Part I.A.1 through the MS4 is not authorized by this state permit	DES/DSB DES/OSEM	July 1, 2014 to present: Chapter 60 (Stormwater Management Ordinance) requires review and approval of a Pollution Prevention (P2) Plan prior to issuance of local Land Disturbing Activities permit. No Land Disturbing permit was issued without the required notes for the implementation of appropriate controls to prevent non-stormwater discharges to the MS4.  A Pollution Prevention (P2) Plan template is provided on the County's Land Disturbing Activity/Stormwater Permit Details website. The P2 plan is checked by inspectors when conducting SWPPP inspections.	<b>•</b>	•	•	Þ	
1.B.1.b	The permittee shall identify in the MS4 program plan all legal authorities for erosion and sediment control and stormwater management that are more stringent than those required under 9VAC25-840 et seq. and/or 9VAC25-870 et seq. that have been adopted in accordance with § 62.1-44.15:65 and/or § 62.1-44.15:33 of the Code of Virginia.	DES/OSEM	Currently there are no legal authorities in place that are more stringent than current state regulations.					
	1.B.2 Retrofitting on Prior Developed Lands							
1.B.2	From the stormwater management project summary list required in Part I.A.6, the permittee shall complete a minimum of fifteen (15) stormwater retrofit projects including projects completed after the June 25, 2018 permit expiration and prior to the effective date of the new permit, during the administratively continued period. The stormwater retrofit projects shall be completed with a minimum of one from each of three categories: street and pond retrofits; stream restoration/shoreline improvement projects; and outfall repairs no later than the expiration of this permit term. The retrofit projects must be selected from the summary of potential	DES/OSEM	A summary of the proposed stormwater retrofit / management projects that have been or will be completed during the time frame specified in the permit will be provided.  Each_project has an information page on the County's website. The pages will be maintained as necessary throughout the implementation of the project.	<b>•</b> •	•	•	•	For retrofit projects not used to meet the TMDL requirements of Part I.E, the permittee shall submit a summary of projects implemented during the reporting period and a cumulative list of all retrofit projects completed to date.  This list shall include as follows: type of land use being retrofitted; the existing stormwater management facility type before retrofit; retrofit type used; retrofit performed; completion date or anticipated completion date; total acreage retrofitted; total impervious and total pervious

	stormwater management projects listed in Part 1.A.6 of this permit. Projects implemented to meet the requirements of Part I.E this permit (TMDL action plans) may be used to meet the requirements identified in this section.  In addition to the fifteen (15) stormwater retrofit projects described in the previous paragraph, the permittee shall implement tree planting and replacement programs as follows:						acreage retrofitted; location of retrofit by latitude and longitude (in decimal degrees); and SWM facility unique identifier number. Each annual report shall include a status update for those projects for which implementation began during the reporting period.
1.B.2.a	Plant a minimum of 2,000 trees on County park land and County-owned rights-of-way no later than 60-months after the effective date of this permit.	DPR	The County adopted the Forestry and Natural Resources Plan (FNRP) In December 2023. This plan is an update to the 2004 Urban Forest Master Plan and the 2010 Natural Resources Management Plan. The plan collectively addresses the conservation, planting, and management of trees and unique ecosystems in Arlington County.  The plan prioritizes reestablishing and maintaining at least 40% tree canopy County-wide through conservation and tree planting programs tailored to local conditions and ecological contexts. This priority will be accomplished via multiple initiatives, partnerships, and programs.  Staff utilize a GIS inventory of existing street trees and available planting spaces to plan and implement street tree installations each year. Areas are identified for tree planting each year in parks and County-owned open spaces.	<b>&gt;</b>		•	Each annual report shall provide the total number of trees planted on County parkland and County-owned rights-of-way during the reporting cycle and cumulative for the permit cycle.
1.B.2.b	Implement a program designed to distribute a minimum of 2,000 trees to private property owners during the term of this permit.	DPR EcoAction Arlington	Another objective in Arlington's FNRP is, "Encourage the preservation and planting of trees on private property". In addition to educational outreach to residents that stresses the importance and the benefits gained from planting trees on their property, Arlington County has two programs to provide residents with trees:  • The Tree Distribution Program  • The Tree Canopy Fund Grant Program The County's Tree Distribution Program is held annually each fall, in partnership with the Tree Steward volunteer organization. The program is widely advertised. Staff and Tree Steward Volunteers provide residents with tree planting and tree care advice.	<b>&gt;</b>		•	Each annual report shall include the implementation status of planting trees on private property including the total number of trees distributed to private property owners during the reporting cycle and cumulative for the permit cycle.

			Arlington's Tree Canopy Fund Grant Program is administered in partnership with the non-profit organization EcoAction Arlington. This program					
			provides grants to neighborhood groups to have trees planted on private property. The program is funded mainly by private developers through tree planting contribution requirements associated with development projects. Through this program,					
			neighborhood groups may apply for tree planting grants each spring. Grant applications are reviewed by a committee of County staff, staff from Eco Action Arlington and members of Arlington's					
	The permittee shall continue to implement its programs to provide financial and/or technical assistance for the installation of small-scale practices to reduce stormwater runoff from private properties.		Urban Forestry Commission.  The County's "Stormwater at Home" website provides information and resources for implementing / installing stormwater management practices at home. Staff also provide technical assistance to property owners regarding drainage concerns and ways to reduce runoff. The County offers webinars on rain gardens and continues to participate in the Northern Virginia Rain Barrel program. The County will continue to participate in the Green Home and Garden Tour, which showcases watershed friendly gardens and stormwater management projects on private properties in Arlington.  In FY24, the County moved to funding its stormwater management program through a Stormwater Utility fee.  Voluntary credits are elective actions that property owners can choose to take to reduce stormwater runoff or improve the environment. Actions include conversation landscaping, tree planting, rainwater collection, rain gardens, and permeable	•	•	•	<b>&gt;</b>	Each annual report shall provide a summary of the programs for the year that provided financial and /or technical assistance to property owners to reduce stormwater runoff to include the date, the number of participants, and the type of financial and/or technical assistance provided.
			driveways.					
	1.B.3 Roadways	DEC/OCENA	The Country will be the second					
	Operation of activities taken by the permittee, or a contractor on their behalf, to maintain or improve paved surfaces such as roadways, streets, sidewalks, and/or parking lots shall be conducted in a manner to minimize discharge of pollutants, including those pollutants contained in anti-icing or deicing compounds or abrasives used for snow and ice management.	DES/OSEM	The County will continue to conduct operations associated with maintenance and repair of roads, streets, sidewalks, and parking lots in a manner to minimize pollutant discharges to the MS4 and surface waters. Training, SOPs, contract language, equipment maintenance, proper storage of materials are all part of this effort.	•	•	•	<b>&gt; &gt;</b>

1.B.3.a	The permittee shall continue to implement its street cleaning program and shall clean a minimum of 30,000 lane miles during this permit cycle.	DES/SWB	The County will continue its street sweeping program. A minimum of 30,000 lane miles will be swept during this permit cycle.  Arlington's 59 civic associations have been grouped into 14 street sweeping zones. Street sweeping occurs yearly from April-October. Citizens are asked to move their cars from their streets so that the street sweepers can provide more effective sweeping. The schedule for each FY is provided on the County's Street Sweeping load is collected by County staff utilizing the truck weigh scale at the Earth Products Recycling Yard (EPRY). The daily sweeping mileage is calculated using a separate odometer in the sweeper, which only records when the sweeper head is in the down position. Both tonnage and daily mileage information are tracked.	<b>&gt;</b>	•	•	The permittee shall include a description of the permittee's street cleaning program including the number of lane miles cleaned each year and the total cleaned cumulatively since permit issuance in each annual report.  If the permittee reports pollutant removal credit for street cleaning towards the Chesapeake Bay TMDL requirements, reporting shall be submitted following the Recommendations of the Expert Panel to Define Removal Rates for Street and Storm Drain Cleaning Practices Final Report approved by the Chesapeake Bay Program, dated May 19, 2016. This includes record-keeping requirements to include as follows: actual sweeper routes and type of road; total curb miles cleaned on each route, average parking conditions; sweeper technology used (Advanced Sweeper Technologies); and number of cleaning passes per year on each qualifying route. The permittee shall maintain records of the actual miles cleaned, by date, for the entire MS4 sweeper fleet over the reporting year.
1.B.3.b	The permittee shall continue to implement written protocols for permittee-maintained road, street, and parking lot maintenance, equipment maintenance and material storage designed to minimize pollutant discharge.	DES/OSEM DES/WSS DES/SWB DES/FMB DES/ENG DPR	The County updated its Roadways Pollution Prevention Protocols in 2022. A copy of the plan can be found in Appendix C.	<b>&gt; &gt;</b>	<b>&gt;</b>	<b>&gt;</b>	The permittee shall include an updated version of the written protocols identified in Part I.B.3.b) if any changes are made during the reporting year.
1.B.3.c	The permittee shall review their existing procedures for snow and ice management and identify within 12 months of permit issuance opportunities to implement enhanced best management practices that promote efficient management and application of anti-icing and deicing compounds.	DES/WSS DES/FMB DPR	The County has been implementing best management practices to promote efficient management and application. This includes conducting operations in several phases, training staff, calibrating equipment, using brine, and only treating roads when forecasted conditions and road surface temperatures warrant application.	June 30, 2022	<b>&gt;</b>	<b>&gt;</b>	The permittee shall include in each annual report a summary of its snow and ice management program, including an overview of enhanced best management practices implemented and identification of any new practices incorporated during the reporting period
1.B.3.d	The permittee shall implement protocols designed to minimize the discharge of pollutants associated with equipment maintenance, equipment storage and storage of anti-icing and deicing compounds, abrasives and other materials. Materials utilized for deicing and sanding activities shall remain covered from precipitation until application.	DES/WSS DES/EB DES/FMB DPR	Protocols to minimize the discharge of pollutants associated with equipment maintenance, equipment storage and storage of anti-icing and deicing compounds, abrasives and other materials are covered in the Roadways Pollution Prevention Protocols.  These protocols are followed by staff that are involved in these types of operations.  P2 protocols are covered / reviewed during employee P2 and Snow Operations training.	<b>&gt; &gt;</b>	<b>&gt;</b>	•

1.B.4.a	The permittee shall develop and implement nutrient management plans that have been developed by a nutrient management planner certified in accordance with 10.1-104.2 of the Code of Virginia on all lands owned or operated by the MS4 permittee where nutrients are applied to a contiguous area greater than or equal to one acre. If nutrients are applied to achieve final stabilization of a land disturbance project, application shall follow the manufacturer's recommendations. The nutrient management plans shall be implemented in accordance with the following schedule:	DPR	Nutrient management plans (NMPs) have been developed for all County maintained areas where the nutrients are applied to a contiguous area greater than or equal to one acre.  The County works with a turf management contractor to implement and update NMPs for County lands where nutrients are applied to a contiguous area greater than one acre.  DPR currently maintains/applies nutrients to certain lands owned by Arlington Public Schools (APS). APS's MS4 program plan provides a list of	•	<b>&gt;</b>	•	•	
			APS owned lands and the status of nutrient management plan development to meet the requirements of APS's MS4 permit.					
1.B.4.a.1	No later than 12-months after the effective date of this permit, the permittee shall identify all lands owned or operated by the permittee where nutrients are applied to a contiguous area of greater than or equal to one acre. A latitude and longitude (in decimal degrees) shall be provided for each such piece of permittee land.	DPR	County staff have identified all County lands where nutrients are applied to a contiguous area of more than one acre. A list of these areas and associated latitude and longitude is provided in the MS4 Annual Report.	June 30, 2022	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	Each annual report shall include a list of all permittee lands where nutrients are applied to a contiguous area greater than or equal to one acre on which nutrients are applied. The list shall also identify all properties for which nutrient management plans have been implemented. The list shall also include the date of the most recent management plan and cumulative total acreage under nutrient management plans.
1.B.4.a.2	The permittee shall continue implementation of nutrient management plans on all permittee lands where nutrients are applied to a contiguous area of greater than or equal to one acre.	DPR	The County continues to work with a certified planner to ensure NMPs are implemented and updated every three years as required.	<b>&gt;</b>	<b>&gt;</b>	<b>•</b>	<b>&gt;</b>	
1.B.4.a.3	Any newly identified lands will be covered by nutrient management plans within six months of identification.	DPR	NMPs will be developed and implemented for any new areas where nutrients are applied to a contiguous area of one acre or more within six months of being identified.	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	
1.B.4.a.4	The permittee shall annually track the following on all lands owned or operated by the MS4 permittee where nutrients are applied to a contiguous area greater than or equal to one acre:  a) The total acreage of permittee lands upon which nutrients are applied and controlled using general County guidelines or standard operating procedures; b) The acreage of permittee lands where nutrient management plans are required; and, c) The acreage of permittee lands covered by nutrient management plans that have been implemented.	DPR	County staff currently track total acreage where nutrients are applied on County lands. This information will be provided in each annual report.	•	<b>&gt;</b>	•	•

1.B.4.b	The permittee shall continue to employ good housekeeping / pollution prevention measures in the application, storage, transport and disposal of pesticides, herbicides, and fertilizers	DPR DES/WSS	Pesticide, herbicide, and fertilizer applications are performed by commercial applicators or registered technicians. These applicators receive yearly training and follow application instructions as directed on each product label.					
			All products are stored in secured areas and kept in spill proof containers, with spill kits nearby.					
			During transport, products are kept secured and in spill proof containers. Vehicles carrying pesticides and herbicides have spill kits.  Label recommendations and applicable laws and regulations are followed to ensure proper disposal of products. Empty containers are triple rinsed and punctured before disposal. Products not utilized completely are discarded via a commercial chemical disposal company.	•	•	<b>&gt;</b>	<b>&gt;</b>	
1.B.4.c	The permittee may regulate the use, application, or storage of fertilizers pursuant to 3.2-3602 of the Code of Virginia			<b>&gt;</b>	•	<b>&gt;</b>	<b>&gt;</b>	
1.B.4.d	The permittee shall track the acreage of permittee lands managed under Integrated Pest Management Plans.	DPR	The County tracks areas managed using Integrated Pest Management (IPM) practices. DPR's Parks and Natural Resources Division follows an Integrated Pest Management (IPM) approach when maintaining landscape areas and controlling invasive plants. This involves monitoring areas to determine whether control actions are warranted, and if so, utilizing environmentally responsible treatment options that include mechanical and chemical alternatives to treat weeds, pests, and invasive plant infestations.	<b>&gt;</b>	• •	<b>&gt;</b>	•	Each annual report shall include the number of acres managed under Integrated Pest Management Plans.
	<b>B.5 Illicit Discharges and Improper Disposal</b> Discharges to the MS4 not authorized by this permit shall							
	be effectively prohibited							
1.B.5.a	In accordance with Part I.A.1.b), certain non-stormwater discharges to the MS4 need not be addressed as illicit discharges or improper disposal. The MS4 program plan shall identify any non-stormwater discharges listed under Part I.A.1.b), where the permittee has imposed any conditions on the discharges to the MS4. The permittee shall prohibit, on a case-by-case basis, any individual non-stormwater discharge (or class of non-stormwater discharges) otherwise allowed under this paragraph that is determined to be contributing significant amounts of pollutants to the MS4.	DES/OSEM	Where it is determined that an individual non- stormwater discharge listed in Part I.A.1.b is contributing a significant input of pollutants to the MS4, the County will take appropriate follow-up action(s) and notify the responsible party that the discharge must be ceased or altered in way that no longer contributes significant pollutant(s) to the MS4. Where necessary, enforcement measures outlined in Chapter 26 of the County Code as well as other applicable chapters of the code (Fire) may be taken to ensure corrective action is	<b>&gt;</b>	•	•	•	Each annual report shall include a list of illicit discharges identified, the source, a description of follow-up activities and whether the illicit discharge has been eliminated.

				1	2	3 4	5	
			implemented and the discharge is ceased or is not repeated (in the case of transient discharges).					
1.B.5.b	The permittee shall continue implementing a sanitary sewer inspection program to minimize the exfiltration from the sanitary system to the MS4.  The permittee shall inspect a minimum of 400,000 linear feet of	DES/WSS	The County implements a <u>sewer maintenance</u> <u>program</u> that includes inspection and <u>relining</u> of the public sanitary sewer system in order to maintain the integrity of the system.					Each annual report shall list the linear feet of sanitary sewer inspected during the reporting year.
	sanitary sewer during this permit cycle.		Inspection of the County's sanitary sewer system is done by TV inspections. Maintenance and inspections are tracked in the County's asset management system, Cartegraph. A minimum of 400,000 linear feet will be inspected during this permit cycle.	•		<b>&gt;</b>	• •	
1.B.5.c	The permittee shall continue to develop and implement a program to reduce the discharge of floatables (e.g., litter and other human-generated solid refuse), including the floatables monitoring required in Part I.C.3 of this permit.	DES/SWB DES/WSS DES/OSEM EcoAction Arlington	In addition to the County's regular refuse collection and recycling programs, the discharge of human-generated solid waste to the storm sewer system and streams is addressed primarily through the street sweeping and catch basin/storm sewer cleaning programs, as well as through outreach and education programs.  Arlington County conducts education and outreach activities for a variety of stormwater and watershed management issues, including nonpoint	•				Each annual report shall include a summary of the permittee's program to reduce floatables generation at the source, including but not limited to: pollution prevention; public education; refuse and recycling collection; litter control; structural pilot projects; or street sweeping programs and a summary of program effectiveness.
			source pollution, illicit discharges and pollution prevention, litter, and recycling. The County has an Adopt a Park volunteer program where residents can adopt a park or dog park and pledge to keep it clean. The County provides supplies and debris pick-up for this program.  Arlington County continues to install stormwater retrofits throughout the County, which will help capture floatables, sediment, and other pollutants.					
1.B.5.d	The permittee shall prohibit the dumping or disposal of used motor vehicle fluids, household hazardous wastes, sanitary sewage, grass clippings, leaf litter, and domestic animal wastes into the MS4. The permittee shall ensure the implementation of programs to collect used motor vehicle fluids (such as oil and antifreeze) and household hazardous waste materials for recycling, reuse, or proper disposal. Such programs shall be readily available to all private residents and shall be publicized and promoted on a regular basis not less than twice per year.	DES/OSEM DES/WPCB ACFD	Pollution discharges to the County's MS4 and surface waters are prohibited. Arlington County Code 26-7 C states, it shall be unlawful for any person to discharge directly or indirectly into the storm sewer system or state waters, any substance likely, in the opinion of the County Manager, to have an adverse effect on the storm sewer system or state waters.  DES/SWB and WPCP manage the County's household hazardous materials (HHM) program, which provides for the safe collection, transport	•				

MS4	Permit Requirement	Responsible Party	Program Plan Elements	Due	An	nua	Specific Reporting Requirements
Action ID				Date			ne
				Perm	it Yea	ar	
				1 2	3	4	5
			and disposal of HHM material in an environmentally appropriate manner as part of a comprehensive strategy that promotes citizen awareness regarding proper handling of HHM; reduces the amount of HHM in the municipal solid waste stream, which ultimately is taken to combustors or landfills; limits the amount of HHM which is dumped down a drain and ultimately discharged to the County's Water Pollution Control Plant, or is dumped indiscriminately; and helps to reduce the risk of injuries to workers, the community, and the environment.  The County hosts biannual E-CARE events where residents can safely dispose of HHM and other				
1.B.5.e	The permittee shall continue to implement a program to locate and eliminate illicit discharges and improper disposal into the	DES/OSEM	items such as electronics.  The County will continue its IDDE program, which consists of storm sewer inspections, routine	<b>&gt; &gt;</b>	· •	<b>&gt;</b>	
	MS4. This program shall include dry weather screening activities to locate portions of the MS4 with suspected illicit discharges and improper disposal, as described in Part I.B.12.a) of this permit.		inspections, complaint response and follow-up, volunteer bacteria monitoring and reporting, training, and education about reporting illicit discharges, public outreach, and education on preventing stormwater pollution, and dry weather screenings (see section 1.B.12.a)				
			Select outfalls that drain the Shirlington Commercial District and a commercial / high density residential area near S Four Mile Run Drive will be screened on an annual basis. Follow-up drainage area investigations will be conducted if evidence of an illicit discharge is observed during screening.				
			Sampling is also conducted during investigations of reported illicit discharges when applicable. When the source of the illicit discharge is identified, the County works with the responsible party to ensure the discharge is eliminated and/or not repeated.				
1.B.5.f	The permittee shall require the elimination of illicit discharges and improper disposal practices within 30-days of discovery. Where elimination of an illicit discharge within 30-days is not possible, the permittee shall require an expeditious schedule for removal of the discharge. In the interim, the permittee shall require the operator of the illicit discharge to take all reasonable and prudent measures to minimize the discharge of pollutants to the MS4.	DES/OSEM DES/WSS ACFD	When the County identifies the source of an illicit discharge and/or improper disposal practices, the responsible party is notified and required to eliminate the discharge (either immediately or within a specified time frame) and/or not repeat the practice/activity that caused the discharge.  Enforcement action may be taken when a responsible party fails to comply with the		•	•

					2		1 =	
			conditions of the notification or repeats an action they already received a notification about. Notices of violation are issued to responsible parties. Enforcement provisions are provided in Section 26-10 of the Arlington County Code. If a discharge cannot be eliminated within 30 days, the responsible party shall take measures to minimize the discharge of pollutants to the MS4 until the discharge is eliminated.					
	1.B.6 Spill Prevention and Response							
1.B.6	The permittee shall continue to implement a program that coordinates with the Fire Department and other County departments to prevent, contain, and respond to spills that may discharge into the MS4. The spill response program may include a combination of spill response actions by the permittee (and/or another public or private entity), and legal requirements for private entities within the permittee's jurisdiction.	DES/OSEM DES/WSS DES/SWB DES/EB DES/TEO DPR ACFD ACPD	The Arlington County Fire Department is the initial responder for most spills. The Hazardous Materials Team is dispatched through the County's Emergency Communications Center. The team employs practices (absorption, diking, damming) to contain spills and prevent materials from entering the storm drain system. The Fire Department Hazardous Materials Team and Fire Marshal work with responsible parties to ensure proper clean up actions are conducted, and safety / traffic hazards are mitigated.  Many of the Arlington County vehicles used for field operations are equipped with spill kits to handle small spills in the field. Police personnel also carry some spill response equipment in their vehicles.  Spill kits have been installed at various locations throughout the Arlington County Trades Center and other municipal facilities. Spills kits are located at County fueling stations.  The Spill Prevention, Control and Countermeasures Plan for the Arlington County Trades Center continues to be implemented.  Training on spill prevention and response is conducted for staff working at HPMF.  Information on spills that enter the MS4 is tracked in the County's Illicit Discharge Information	<b>&gt;</b>		•		Each annual report shall include a list of spills, that qualify for immediate reporting as required under Part II.G and H of this permit, the source, (identified to the best of the permittee's ability), and a description of follow-up activities taken.
	1.7 Industrial & High-Risk Runoff		Tracking System database.					
1.7	The permittee shall implement a program to identify and	DES/OSEM	Industrial facilities are defined per 40 CFR					The annual report shall include a list of all known
	control pollutants in stormwater discharges to the MS4 from	ACFD	122.26(b)(14); a VPDES industrial stormwater					industrial and high-risk dischargers including any

	industrial and high-risk runoff facilities. Facilities with individual industrial VPDES stormwater permits or coverage under the industrial stormwater general permit may be included in the program at the discretion of the permittee.	ACHD	permitted facility; an industrial stormwater facility granted no exposure certification by DEQ; and any other facility with a "stormwater discharge associated with industrial activity."  High-risk facilities are defined as municipal landfills; other treatment, storage, or disposal facilities for municipal waste; hazardous waste treatment, storage, disposal, and recovery facilities; and facilities that are subject to EPCRA Title III, Section 313.  At this time, the only known high risk facilities in the County are the Arlington County Water Pollution Control Plant (that has a temporary storage area for household hazardous materials), Joint Base Myer – Henderson Hall, and Virginia Concrete Shirlington Plant. The WPCP and JBM-HH are subject to EPCRA Title III, Section 313 given their potential to generate and/or manage hazardous waste and release hazardous chemicals to the environment, but do not report to the Toxics Release Inventory. The WPCP has an individual municipal wastewater permit (VA0025143) and a stormwater industrial general permit (VAR051421). Inspections of the facility and outfalls are conducted as part of the SWPPP required by these permits. Virginia Concrete does report to the Toxic Release Inventory and has a concrete general permit (VAG110087) from the state.  The County maintains a list of all known VPDES industrial stormwater general permitted facilities. Periodically, County staff contacts DEQ to verify their list of permitted facilities in Arlington County is accurate and up to date as the County is not always notified when a new VPDES permit is issued				non-VPDES regulated industrial and commercial stormwater dischargers determined by the permittee as having the potential to contribute a significant pollutant load and that discharge to the MS4 system, a schedule of inspections and procedures for inspecting points of connection or outfalls, whichever occurs first to the permittee's MS4.
1.7.a	The permittee shall maintain, and update as necessary, a list of all known industrial and high-risk dischargers to the MS4.	DES/OSEM	by DEQ.  An updated list of high-risk facilities will be provided in each annual report.	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	
1.7.b	The permittee shall maintain a list of any industrial and/or commercial stormwater dischargers not permitted by the Board that it determines have the potential to contribute a significant pollutant loading to the MS4. This list may be individual discharges or categories of discharges.  1) The list shall include, but shall not be limited to, major automotive facilities such as repair shops, body shops, auto detailers, tire repair shops and service stations.	DES/OSEM DES/SWB ACFD HD	The County maintains a list of industrial and commercial facilities or businesses that have the potential to contribute significant pollutant loading to the MS4 based on the type of the operations conducted at the facility, exposed outdoor material or equipment storage, and the likelihood of pollutant discharges. The list includes major automotive facilities, including repair shops, body	<b>&gt;</b>	• •	<b>&gt; &gt;</b>	Each annual report shall report on implementation of the inspection schedule and include a list of the facilities and/or facility outfalls or points of connections to the permittee's MS4 inspected during the reporting period.

	For each new high-priority municipal facility identified under Part I.B.9.b).3), develop and implement an individual stormwater pollution prevention plan within six months of commencing operation at the facility. Stormwater pollution prevention plans (SWPPP) shall include:  a) A site description that includes a site map identifying all outfalls, direction of flows, existing source controls and receiving water bodies; b) A discussion and list of potential pollutants and pollutant sources; c) A discussion of all potential non-stormwater discharges; d) A maintenance schedule for all existing BMPs; e) All policies and procedures implemented at the facility to ensure source reduction; f) An inspection schedule and checklist to ensure that all source reductions are continually implemented and all source controls are appropriately maintained. The date of each inspection and associated findings and follow-up shall be logged in each SWPPP; g) Appropriate training as required in Part I.B.2.11; h) Procedures to conduct dry weather screening; and, i) All modifications made as the result of any release or spill.	DES/FE/FMB DES/TEO DES/TR DPR ACFD ACPD	the information (items a-i) listed in section 1.B.9.b.4.  All HPMF SWPPPs have been reviewed and updated to include the information outlined in 1.B.9.b.4 a-i.	1 2	3	4	
1.B.9.b.5	A copy of each SWPPP shall be kept at each high-priority municipal facility and be kept updated.	DES/OSEM DES/WSS DES/SWB DES/TR	SWPPPs are kept at all HPMFs. All SWPPPs are also available to staff on shared directories as well.	<b>&gt;</b>	•	<b>&gt;</b>	<b>-</b>
1.B.10	Public Education / Participation						
	The permittee shall continue to implement a public education program with the goal of increasing the stormwater knowledge of target audiences and changing behavior to result in pollutant reductions. The permittee may fulfill all or part of the requirements of this permit through regional outreach programs involving two or more MS4 localities.	DES/OSEM	The County will continue to implement its education and outreach program. The goal of the program is to increase awareness of stormwater pollution and educate the community about actions that can reduce pollution discharges to the MS4 and surface waters.	<b>&gt;</b>	•	•	Each annual report shall include a list of permittee public outreach and education activities and the estimated number of individuals reached through the activities. An evaluation of program effectiveness, as outlined in the MS4 program plan with recommendations for future changes shall also be included.
1.B.10.a	The permittee shall identify, schedule, implement, evaluate and modify, as necessary, public outreach activities designed to meet the following public education and outreach goals:	DES/OSEM					
1.B.10.a.1	Promote, publicize, and facilitate public reporting of the presence of illicit discharges or improper disposal of materials into the MS4;	DES/OSEM	The County's "Report Stream Pollution" webpage provides information on how to report illicit discharges as well as images of example pollution incidences. This webpage assists the public with identifying what different types of stream pollution look like.	<b>&gt;</b>	•	<b>&gt;</b>

1.B.12.a.2	Dry weather screening procedures shall be documented in the	DES/OSEM	A summary of any follow-up actions taken to eliminate any unauthorized non-stormwater discharges will be included in each annual report.  See Appendix E - Arlington County Dry Weather						
	MS4 program plan.		Screening Program Plan, MS4 Permit VA0088579 (2021-2026 Permit Cycle)						
1.B.12.b	Wet Weather Monitoring Program: In addition to monitoring required in Part I.C, the permittee shall continue to implement a wet weather monitoring program to characterize the stormwater discharged to and from the MS4. Within six (6) months of the permit effective date, the permittee shall provide an updated copy of the "Arlington County Wet Weather and High Risk Screening Program: Site Selection and Screening Plan" to the Department to include the specific locations where wet weather monitoring will be conducted.	DES/OSEM	The County will continue to implement its wet weather monitoring program to characterize stormwater discharged to and from its MS4.  The County revised its Wet Weather Monitoring Plan in November 2023.  A copy of the Arlington County Wet Weather Monitoring Program Plan, MS4 Permit VA0088579 (2021-2026 Permit Cycle) is provided in Appendix	December 30, 2021	•	•	<b>&gt;</b>	<b>•</b>	
1.B.12.b.1	<ul> <li>Two (2) stormwater outfall monitoring sites within the County shall be monitored during the term of this permit. The two outfall monitoring locations shall be selected with preference for sites meeting the following criteria:         <ul> <li>Located in a drainage area with a land use that is suspected to contribute significant pollutant loads to the County's MS4;</li> <li>Located with a receiving water listed as impaired in the Virginia 2020 305(b)/303(d) Water Quality Assessment Integrated Report;</li> <li>Located downstream of a Best Management Practice (BMP) to assist with evaluation of the implemented control; and</li> <li>The permittee can provide a paired comparison to a drainage area with a less intensive land use provided the three criteria listed immediately above are first considered.</li> </ul> </li> </ul>	DES/OSEM	Originally, Outfall 17217 and Outfall 21131 were planned to be monitored during this permit term. However, in FY24, Outfall 17217 was only sampled during the first quarter. The outfall location was switched to another outfall (Outfall 20280) due to safety issues accessing Outfall 17217.  All outfalls are located in the Four Mile Run watershed and have drainage areas with land uses that are suspected to contribute significant pollutant loads to the County's MS4. The outfalls discharge stormwater runoff to Four Mile Run, which is listed as an impaired surface water in the Virginia Department of Environmental Quality 2020 305(b)/303(d) Water Quality Assessment Integrated Report.	•	•	•	•	•	Each annual report shall include a list of locations upon which wet weather monitoring was conducted: weather conditions at the time the sample was collected to include date and approximate time of most recent storm event preceding sample collection and a summary of the monitoring results.

				1 2	3	4	 5
1.B.12.b.2	The permittee shall conduct wet weather discharge monitoring for the following minimum list of constituents. With resubmittal of the Arlington County Wet Weather and High Risk Screening Program Plan, the permittee may add to the list of constituents to be tested as deemed appropriate for that outfall monitoring site and provide an updated testing list in the screening program plan.  (a) E. coli  (b) Nitrate and Nitrite Nitrogen  (c) Total Suspended Solids  (d) Chemical Oxygen Demand  (e) Total Phosphorus  (f) Total Kjeldahl Nitrogen  (g) Zinc  (h) Cadmium  (i) Copper  (j) Lead  (k) Hardness  (l) Specific Conductance  (m) Temperature  (n) pH		Per the County's Wet Weather Monitoring Plan, the following water quality parameters will be analyzed:  - E. coli - Nitrate and Nitrite Nitrogen - Total Kjeldahl Nitrogen - Total Phosphorus - Total Suspended Solids - Chemical Oxygen Demand - Zinc - Cadmium - Copper - Lead - Hardness - Specific Conductance - Temperature - pH	<b>&gt;</b>	•	•	
1.B.12.b.3	Monitoring shall be conducted, at a minimum of once per calendar quarter, at least 14 days apart between July 1 and June 30 at each monitoring location using the following quarterly calendar schedule: July 1 – September 30 October 1 – December 31 January 1 – March 31 April 1 – June 30  The standard operating procedures for the wet weather monitoring program shall continue to be incorporated as part of the MS4 program plan. Any updates to monitoring locations and/or procedures during the reporting year shall be documented in the MS4 program plan and a summary provided with the applicable annual report.	DES/OSEM	Outfall monitoring will be conducted once per calendar quarter each permit year (July 1 – June 30).  • July 1 – September 30 • October 1 – December 31 • January 1 – March 31 • April 1 – June 30  Monitoring will be conducted at least 14 days apart.  Program methodologies are outlined in the Arlington County Wet Weather Monitoring Program Plan.	<b>&gt; &gt;</b>	•	•	
1.B.13	Infrastructure Coordination						
1.B.13	The permittee shall coordinate with the Virginia Department of Transportation (VDOT) regarding issues of MS4 physical-interconnectivity as described below:						
1.B.13.a	Annual Coordination Meeting – The permittee shall meet annually with VDOT for purposes of overall coordination on priority issues for the permittee's MS4 program plan (including operations and maintenance elements) and TMDL action planning relevant to the interconnectivity of the MS4s.	DES/OSEM	The County will continue to meet with VDOT annually. The County will attend and participate in joint meetings scheduled and facilitated by the Northern Virginia Regional Commission. These meetings allow for communication and discussion between VDOT and other MS4 jurisdictions.	<b>&gt; &gt;</b>	•	<b>&gt;</b>	-

MS4 Action ID	Permit Requirement	Responsible Party	Program Plan Elements	Due Date Perr		nnua imeli ar		Specific Reporting Requirements
				1	2 3	4	5	
1.B.13.b	Mapping – The permittee shall inform VDOT of the status of its mapping program, identifying any uncertainty regarding ownership or actual location of MS4 components associated with the physically-interconnected MS4s, and working to resolve such uncertainty. The permittee shall coordinate with VDOT to identify any areas within the permittee's municipal boundaries that drain to the VDOT MS4.	DES/OSEM	The County has provided mapping information and data to VDOT. A letter of MS4 interconnection was sent to VDOT in July 2021. The County has requested GIS data from VDOT to assist with identifying any gaps or uncertainties regarding MS4 ownership and corresponding drainage areas.	•	<b>&gt;</b>	•	•	
1.B.13.c	Chesapeake Bay TMDL action plans – The permittee shall inform VDOT of the means, methods, and schedule by which the permittee will implement the reductions required by the Chesapeake Bay TMDL program requirements (Part I.E.1) when those means and methods may impact the physically-interconnected MS4s. The parties are encouraged to cooperate with one another where the siting or design of best management practices (BMPs) may be accelerated or otherwise improved by mutual cooperation.  The permittee shall coordinate with VDOT to identify any areas within the permittee's municipal boundaries that drain to the VDOT MS4 and are unaccounted for in the Chesapeake Bay TMDL action plan developed by VDOT or the permittee. The unaccounted areas shall be quantified (acres) in the Chesapeake Bay TMDL action plan submitted by the permittee.	DES/OSEM	The County currently does not have any TMDL implementation projects that would impact the physically interconnected MS4s.  The County has requested GIS data from VDOT to assist with identifying areas within the County's municipal boundaries that drain to the VDOT MS4 and are unaccounted for in the County's Chesapeake Bay TMDL action plan.	•	<b>&gt;</b>	•	•	
1.B.13.d	Other TMDL action plans – The permittee shall inform VDOT of TMDL action plans and actions implemented for other (i.e., non-Chesapeake Bay) TMDLs when those plans may impact the physically interconnected MS4s. The parties are encouraged to cooperate with one another where the siting or design of BMPs may be accelerated or improved by mutual cooperation.	DES/OSEM	The County currently does not have any projects or programs for local TMDLs that would impact the physically interconnected MS4s.  Actions outlined in the County's Local TMDL Action Plans for PCBs and bacteria benefit local water quality throughout the County.	<b>•</b>	<b>&gt;</b>	•	•	
1.B.13.e	Credit for TMDL Implementation – Permit specific BMP retrofit requirements shall not be double-counted in the calculation of load reductions. If the permittee undertakes the project, the permittee shall be entitled to full credit for the project but may share credit with VDOT on mutually agreeable terms, which shall be in writing.	DES/OSEM	The County will not "double count" any credits for projects implemented for TMDL load reductions.	<b>&gt;</b>	<b>&gt;</b>	•	<b>&gt;</b>	
1.B.13.f	Illicit Discharge Detection & Elimination –The permittee shall coordinate with VDOT on the identification of high risk industrial facilities. The permittee shall establish procedures for notifying VDOT when an illicit discharge is identified in the VDOT MS4.	DES/OSEM	The County will coordinate with VDOT on identifying high risk industrial facilities. VDOT has a maintenance facility (VDOT Arlington Primaries Area Headquarters) at 1500 Columbia Pike.  The County notifies appropriate contacts at VDOT when an illicit discharge is identified in the VDOT right-of-way.	•	<b>&gt;</b>	•	•

			The team leader conducting each monitoring				
			session supervises additional volunteers and				
			instructs in the field, as needed. In addition, the				
			County program manager provides hands-on, in-				
			the-field training to volunteers as needed. The				
			presence of County program manager at a session				
			indicates and confirms that training was provided				
			at the monitoring session.				
			Volunteers assisting the team leaders conducting				
			the monitoring session will be required to attend				
			two trainings during the duration of the permit				
			period. Training options include in-the-field, hands-				
			on-training, and virtual classroom-based trainings –				
			Introduction to Monitoring, Open Lab, Virtual				
			Open Lab, Arlington Macroinvertebrate				
			Communities, Master Identifier Test, the annual				
			volunteer meeting, and the annual team leader				
			and master identifier refresher training.				
			Additional trainings may be developed in the				
			future based on volunteer and program needs.				
			The County program manager will track the				
			participation of volunteers in a database. The				
			training sign-in sheets will serve as back-up				
			documentation of the volunteer's participation.				
			As a volunteer program, the list of participating				
			volunteers who assist the team leader conducting				
			a monitoring session adjusts with time as a				
			response to the volunteers' interests and life				
			events. Sometimes a volunteer may take the				
			introductory training, and then decide to not				
			continue with the program. The County cannot require them to take a second training if they have				
			left the program.				
1.C.2.e	The permittee shall obtain all necessary aquatic wildlife	DES/OSEM	Arlington County is required to obtain a permit

	this may be accomplished through a volunteer program. The permittee will:							
1.C.3.a	Select representative sampling sites in ditches, streams, or channels that discharge to or receive drainage from the MS4. Visually count all floatable material (excluding natural vegetation), trash, and refuse (e.g.: plastic trash bags, bottles, car batteries, shopping carts, etc.) located in the sampling site, visible on the channel bottom, along banks (up to high water mark), or suspended in vegetation located in the sample site. Sites shall be at least 100 feet in length and sampled during or before any litter pickup.	DES/OSEM EcoAction Arlington	Under its work agreement with the County, EcoAction Arlington administers this portion of the floatables monitoring program. Clean-ups and corresponding surveys are conducted at select locations along Four Mile Run as part of their stream cleanup programs. The locations include two sites along lower Four Mile Run at Shirlington Park and at Barcroft Park and one along Four Mile Run near Columbia Pike. All sites are at least 100 feet in length and will be sampled during litter pickup.  The floatables survey will include visual counts of all floatable material (excluding natural vegetation), trash, and refuse (e.g.: plastic trash bags, bottles, car batteries, shopping carts, etc.) located in sampling site, visible on the channel bottom, along banks (up to high water mark), or suspended in vegetation located in the sample site.	•	<b>&gt;</b>	•	•	Each annual report shall include a list of sites surveyed for floatables including a summary of observations at each site, and a determination as to the effectiveness of the floatables reduction program including a summary of the opportunities for source and structural controls.
1.C.3.b	The permittee shall maintain the following records and include a summary of results and trends in each annual report: location of the sample site, total site "counts", and months since the last trash and floatables pick-up from the sampled section	DES/OSEM	Information about site locations and a summary of survey results and trends will be included in each annual report.	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>	<b>&gt;</b>

				1	2	3	4	5	
1.C.3.c	In the first three years of the permit term, the permittee shall implement two structural (2) floatables control pilot projects to evaluate different technologies that would be effective for use in the County. This can be developed as one pilot project with two structural controls and shall include evaluation of quantities accumulated; discussion of the controls, maintenance requirements and any issues; potential for expanded use within the MS4 system; and a summary of the results.	DES/OSEM	As part of the Ballston Pond Retrofit Project, two structural trash control devices were installed to capture floatables coming into the facility: a manufactured trash capture system (Watergoat) and a trash rack and baffles at the outflow structure. The pond receives runoff from more than 300 acres of urban and suburban land.  The County has developed maintenance inspection protocols for the devices to assess the quantity of floatables accumulated during scheduled inspections. The devices are scheduled to be inspected and maintained on a quarterly basis and after significant storm events if needed. The contractor will take photos of the areas prior to cleaning to document the amount / quantity of and types of floatables being collected by the devices. The number of bags of trash collected and any larger debris will be documented. Over the next two years, the County will evaluate the effectiveness of the devices based on cumulative amounts of floatables collected, maintenance	•	•	•	June 30, 2025	•	The fourth annual report shall include an evaluation of the floatables pilot projects with the name of the sites where the pilot projects are implemented and shall include evaluation of quantities accumulated; maintenance requirements and issues; report on controls; opportunities for expanded use for application within the MS4 system; and a summary of the results.
1.D	Structural and Source Controls Compliance Monitoring and		frequency and requirements, issues, and costs.						
	Tracking								
1.D.1	Electronic Database -The permittee shall maintain an updated electronic database or spreadsheet of all known permittee-owned or operated and privately owned stormwater management (SWM) facilities that discharge to or from the MS4. The database shall include the following information:  a) The SWM facility or BMP type, and location by latitude and longitude (in decimal degrees);  b) The unique identifier reference number for each SWM facility listed in the mapping section Part I.B.8.c).1) (b).  c) The acres treated by the stormwater management facility or BMP, including total acres, pervious acres and impervious acres;  d) The date the facility was brought online (MMYYYY). If the date brought online is not known, the permittee shall use June 30, 2005;  e) The 6th Order Hydrologic Unit Code (HUC 6) in which the SWM facility is located;  f) Whether the SWM facility or BMP is owned or operated by the permittee or privately owned;  g) Whether or not the stormwater management facility or BMP is part of the permittee's Chesapeake Bay TMDL action plan required in Part I.E.1 or local TMDL action plan required in Part I.E.2, or both;	DES/OSEM	For the purpose of the MS4 permit, stormwater management facilities (SWMFs) are divided into two classifications: County-owned or Private water quality facilities.  County-owned – Water quality facilities for Arlington County-owned or operated facilities.  Private – Water quality facilities on private property with a Maintenance and Monitoring Agreement (MMA). The universe of water quality facilities without MMAs (prior to implementation of the MMA requirement) is small relative to the number of facilities with MMAs. The County's authority for facilities without MMAs is limited. These facilities are included with the County's tracking and reporting for this permit element but are flagged as not having an MMA.  The County continues to maintain and update information in its asset management database (Cartegraph) of all known County-owned and private SWMF, including facilities known to exist	•	•	•	•	•	A summary of actions taken by the permittee to ensure maintenance of private stormwater management facilities.  A summary of the program to ensure maintenance of stormwater management facilities owned or maintained by the permittee.  A statement either confirming that the electronic database of all known public and private BMPs that discharge to or from the MS4 as required in Part I.D.1 was updated, or that no update was required because no new BMPs were installed.  A list of all BMPs reported to the DEQ CGP Database as required in Part I D.2 for this annual reporting cycle.  A copy of the MS4 BMP Template submitted annually to the DEQ BMP Warehouse in accordance with Part I.D.3 listing the BMPs implemented between July 1 and June 30 of each year for reporting any practices not reported in

	h) Whether the SWM facility discharges into the permittee's MS4; i) If the stormwater management facility or BMP is privately owned, whether a maintenance agreement or maintenance strategy exists; and; j) The date of the permittee's most recent inspection of the stormwater management facility or BMP. The database shall be updated to include the required information for SWM facilities known to exist prior to issuance of this permit.  Facilities that provide peak flow control as required under Chapter 60 of the Arlington County Code are excluded from the requirements of this section. Inspection and maintenance requirements for these facilities shall be in accordance with all applicable state and local ordinances, regulations, and statutes.  The electronic database or spreadsheet shall be updated no later than 30 days after a new stormwater management facility has an as-built drawing that has been approved or is brought online, a new BMP is implemented to meet a TMDL load reduction as required in Part I.E, or discovered if it is an existing stormwater management facility. A copy of the electronic database shall be made available upon request by the		prior to this permit. The County tracks the information specified in section 1.D.1.a-j. The database is updated within 30 days of a SWMF being brought online and the as-built drawing being approved.  A copy of the electronic database will be made available to DEQ upon request.		2	3	4 5	accordance with Part I.D.2, the DEQ Construction Stormwater database.
1.D.2	Department.  DEQ Construction Stormwater Database. The permittee shall use the DEQ Construction Stormwater Database or other application as specified by the Department to report each stormwater management facility installed after July 1, 2014, to address the control of post-construction runoff from land disturbing activities for which the permittee is required to obtain coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities.	DES/OSEM DES/DTS/DSB	Arlington County continues to use the DEQ Construction Stormwater Database to report each stormwater management facility that is brought online / installed to meet the requirements of the VPDES Construction GP and VSMP regulations.	<b>&gt;</b>	<b>&gt;</b>	•	<b>&gt;</b> 1	A list of all BMPs reported to the DEQ CGP Database as required in Part I D.2 for this annual reporting cycle.
1.D.3	BMP Warehouse or the Data Upload System. No later than October 1 each year, the permittee shall use the DEQ BMP Warehouse to input new, upgraded, or retrofitted BMPs implemented between July 1 to June 30 of each year that have not already been reported in accordance with Part I.D.2. This would include the stormwater management facilities installed to control post-development stormwater runoff from land disturbing activities less than one acre in accordance with the Chesapeake Bay Preservation Act regulations (9VAC25-830) and for which a General VPDES Permit for Discharges of Stormwater from Construction Activities was not required. The following BMP information shall not be reported on the MS4 BMP Template in the DEQ BMP Warehouse:	DES/OSEM DES/DTS/DSB	Arlington County continues to use the DEQ BMP Warehouse to input new, upgraded, or retrofitted BMPs implemented between July 1 to June 30 of each year that have not already been reported in accordance with Part I.D.2.	<b>•</b>	<b>&gt;</b>	•	<b>&gt;</b> 1	A copy of the MS4 BMP Template submitted annually to the DEQ BMP Warehouse in accordance with Part I.D.3 listing the BMPs implemented between July 1 and June 30 of each year for reporting any practices not reported in accordance with Part I.D.2, the DEQ Construction Stormwater database.

	1.E.1 Chesapeake Bay TMDL							
1.E.1	The Commonwealth's Phase I, II, and III Chesapeake Bay TMDL Watershed Implementation Plans (WIPs) commit to a phased approach for MS4s, affording MS4 permittees up to three full five-year permit cycles to implement necessary reductions. This permit is consistent with the Chesapeake Bay TMDL and Virginia's Watershed Implementation Plan to meet the Level 2 (L2) scoping run for existing developed lands as it represents an implementation of an additional 35% of L2 as specified in the 2010 Phase I and Phase II WIPs. In combination with the 5.0% reduction of L2 that has already been achieved, a total reduction at the end of this permit term of 40% of L2 will be achieved. Conditions of future permits will be consistent with the TMDL or WIP conditions in place at the time of permit issuance.	DES/OSEM						
1.E.1.a	<ol> <li>Definitions The following definitions apply to Part I.E.1:         <ol> <li>"Existing Sources" means pervious and impervious urban land uses served by the MS4 as of June 30, 2009.</li> <li>"New Sources" means pervious and impervious urban land uses served by the MS4 developed or redeveloped on or after July 1, 2009.</li> <li>"Pollutants of concern" or "POC" means total nitrogen, total phosphorus and total suspended solids.</li> </ol> </li> <li>"Transitional Sources" means regulated land disturbing activities which are temporary in nature and discharge through the MS4.</li> </ol>							
1.E.1.b	Reduction Requirements. No later than the expiration date of this permit, the permittee shall reduce the load of total nitrogen, total phosphorus, and total suspended solids from existing developed lands served by the MS4 as of June 30, 2009 within the MS4 service area by at least 40% of the Level 2 (L2) Scoping Run Reductions. The 40% reduction is the sum of i) the first phase reduction of 5.0% of the L2 Scoping Run Reductions based on the lands located within the MS4 service area as required by June 30, 2018; ii) the second phase reduction of at least 35% of the L2 Scoping Run based on lands within the MS4 service area required by the end of the permit term; and iii) the reduction of at least 40% of the L2 Scoping Run which shall only apply to the additional lands that were added by an increase or expansion of the stormwater system as required by the end of the permit term. The required reductions shall be calculated using Table 2 below.	DES/OSEM		<b>&gt;</b>	<b>&gt;</b>	•	•	June 30, 2026
