

SEE IT, SQUASH IT, BUT ***DON'T USE STICKY TRAPS***

While we encourage action against spotted lanternflies, **sticky traps on trees are not permitted in Arlington County parks.**

DO:

Slow the spread by squashing spotted lanternflies on sight, destroying egg masses, checking your trees and yard regularly, and inspecting vehicles and outdoor items before traveling.

DON'T:

Don't use sticky traps on trees. They trap more than just spotted lanternflies, often endangering beneficial insects and small wildlife like birds.
