# On a scale of 1 to 10, how satisfied are you with the concept?

(1 = unsatisfied , 10 = very satisfied)

# What, if any, additional feedback would you like to share for this final draft conceptual design?

Below are the top 5 most common topics we heard in the comments:

Theme	Request for Bubbling Bluemont Courts:	Use of Both Sides of Practice Court Wall:	Environmental Concerns and Reforestation:	Noise and Light Concerns:	Desire for Multi-functional Courts and Pickleball:
Summary	<p>One of the most common comments we heard was the desire to install a bubble over the Bluemont tennis courts during winter.</p> <p>Commenters noted that this suggestion aims to maximize the County's investment by enabling year-round use of these facilities, thus serving both the tennis community and the broader County interests.</p>	<p>Another strong theme in the comments involved updating the final design to include practice courts on both sides of the hitting wall.</p> <p>It was noted that this adjustment would enhance training opportunities for users, reflecting a desire for more efficient and versatile use of the available space.</p>	<p>As we heard in the last engagement, there are concerns about the preservation of green spaces and the management of reforested areas.</p> <p>Community feedback encourages the need for consistent and sustainable care of reforested areas that have been impacted by invasive species in the past.</p>	<p>Highlighted again in community feedback, community members living near the facility expressed concerns about noise and light pollution.</p> <p>They advocate for design solutions that minimize disturbances, such as employing sound mitigating materials and configuring lighting to ensure it does not negatively impact local living conditions at night.</p>	<p>Input we heard in previous engagements was echoed here, with continued interest in multi-use courts and expanding pickleball facilities.</p> <p>Suggestions include converting existing tennis courts to multi-use courts to accommodate both sports or designing new courts that can be used for multiple activities, ensuring efficient use of space and resources in community parks.</p>
