Crystal Substation Project

Arlington County, Virginia

Dominion Energy®
Powering Your Every Day.™

Upgrades to Crystal Substation are complete. This project expanded and remodeled the facility and will help provide reliable power for Crystal City and nearby neighborhoods.

Improvements at Crystal Substation

- Expanded and remodeled the existing substation.
- Replaced aging equipment.
- Added space to access equipment safely and support future power needs.

Project Milestones

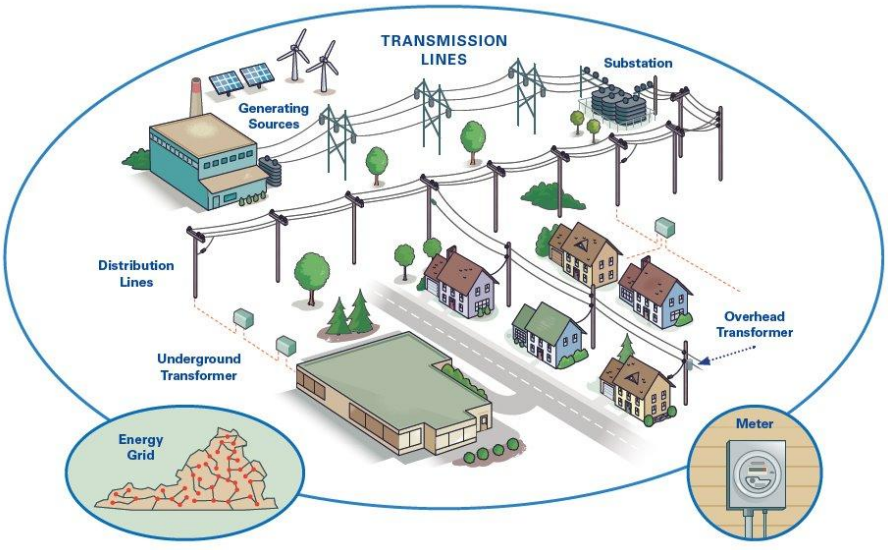

Year	Activity
2020	• Community review • County approval process
2021	• Permits received • Construction began
2026	Substation upgrades complete

Project Benefits

- Helps maintain reliable service for area customers.
- Supports current and future power needs.
- Meets required safety and reliability standards.

How does power reach your neighborhood?

- Transmission lines bring power to a substation.
- Distribution lines then carry it to nearby homes and businesses.
