

Arlington's Transportation Future

Overview

Arlington's Transportation Future is an initiative to create a refreshed transportation plan for Arlington County. The plan will help:

-  Create a **safe, equitable, accessible, easy-to-use, and sustainable** transportation network for all
-  Address the **transportation needs** of current and future community members
-  Guide how we invest in transportation across our community over the coming decades, ensuring that Arlington continues to be a place where people want to live, businesses choose to locate, and visitors come to enjoy

Process Timeline

The plan will be developed in four phases from fall 2024 to 2026. In the first three phases, you'll be able to share your thoughts through questionnaires, in-person public events, and online tools. The final phase will be Board adoption of the plan. Public participation will ensure the plan reflects the unique transportation needs and preferences of our community.

What Will the Plan Include?

- Vision and goals for the future of transportation in Arlington
- Policies and strategies that will guide future decision-making and help us achieve our goals
- A guide for prioritizing improvements to Arlington streets based on safety, equity, accessibility, and other needs
- The integration of other Board-adopted County plans, programs, and initiatives

What Will the Plan Provide?

- A cohesive transportation plan that integrates the six modal elements (bicycle, transportation demand and system management, parking and curb space management, pedestrian, streets, and transit) of the 2007 Master Transportation Plan
- A new framework for transportation planning and decision-making that will set clear expectations and develop a shared understanding of priorities and tradeoffs

The Arlington Community: Today and Tomorrow

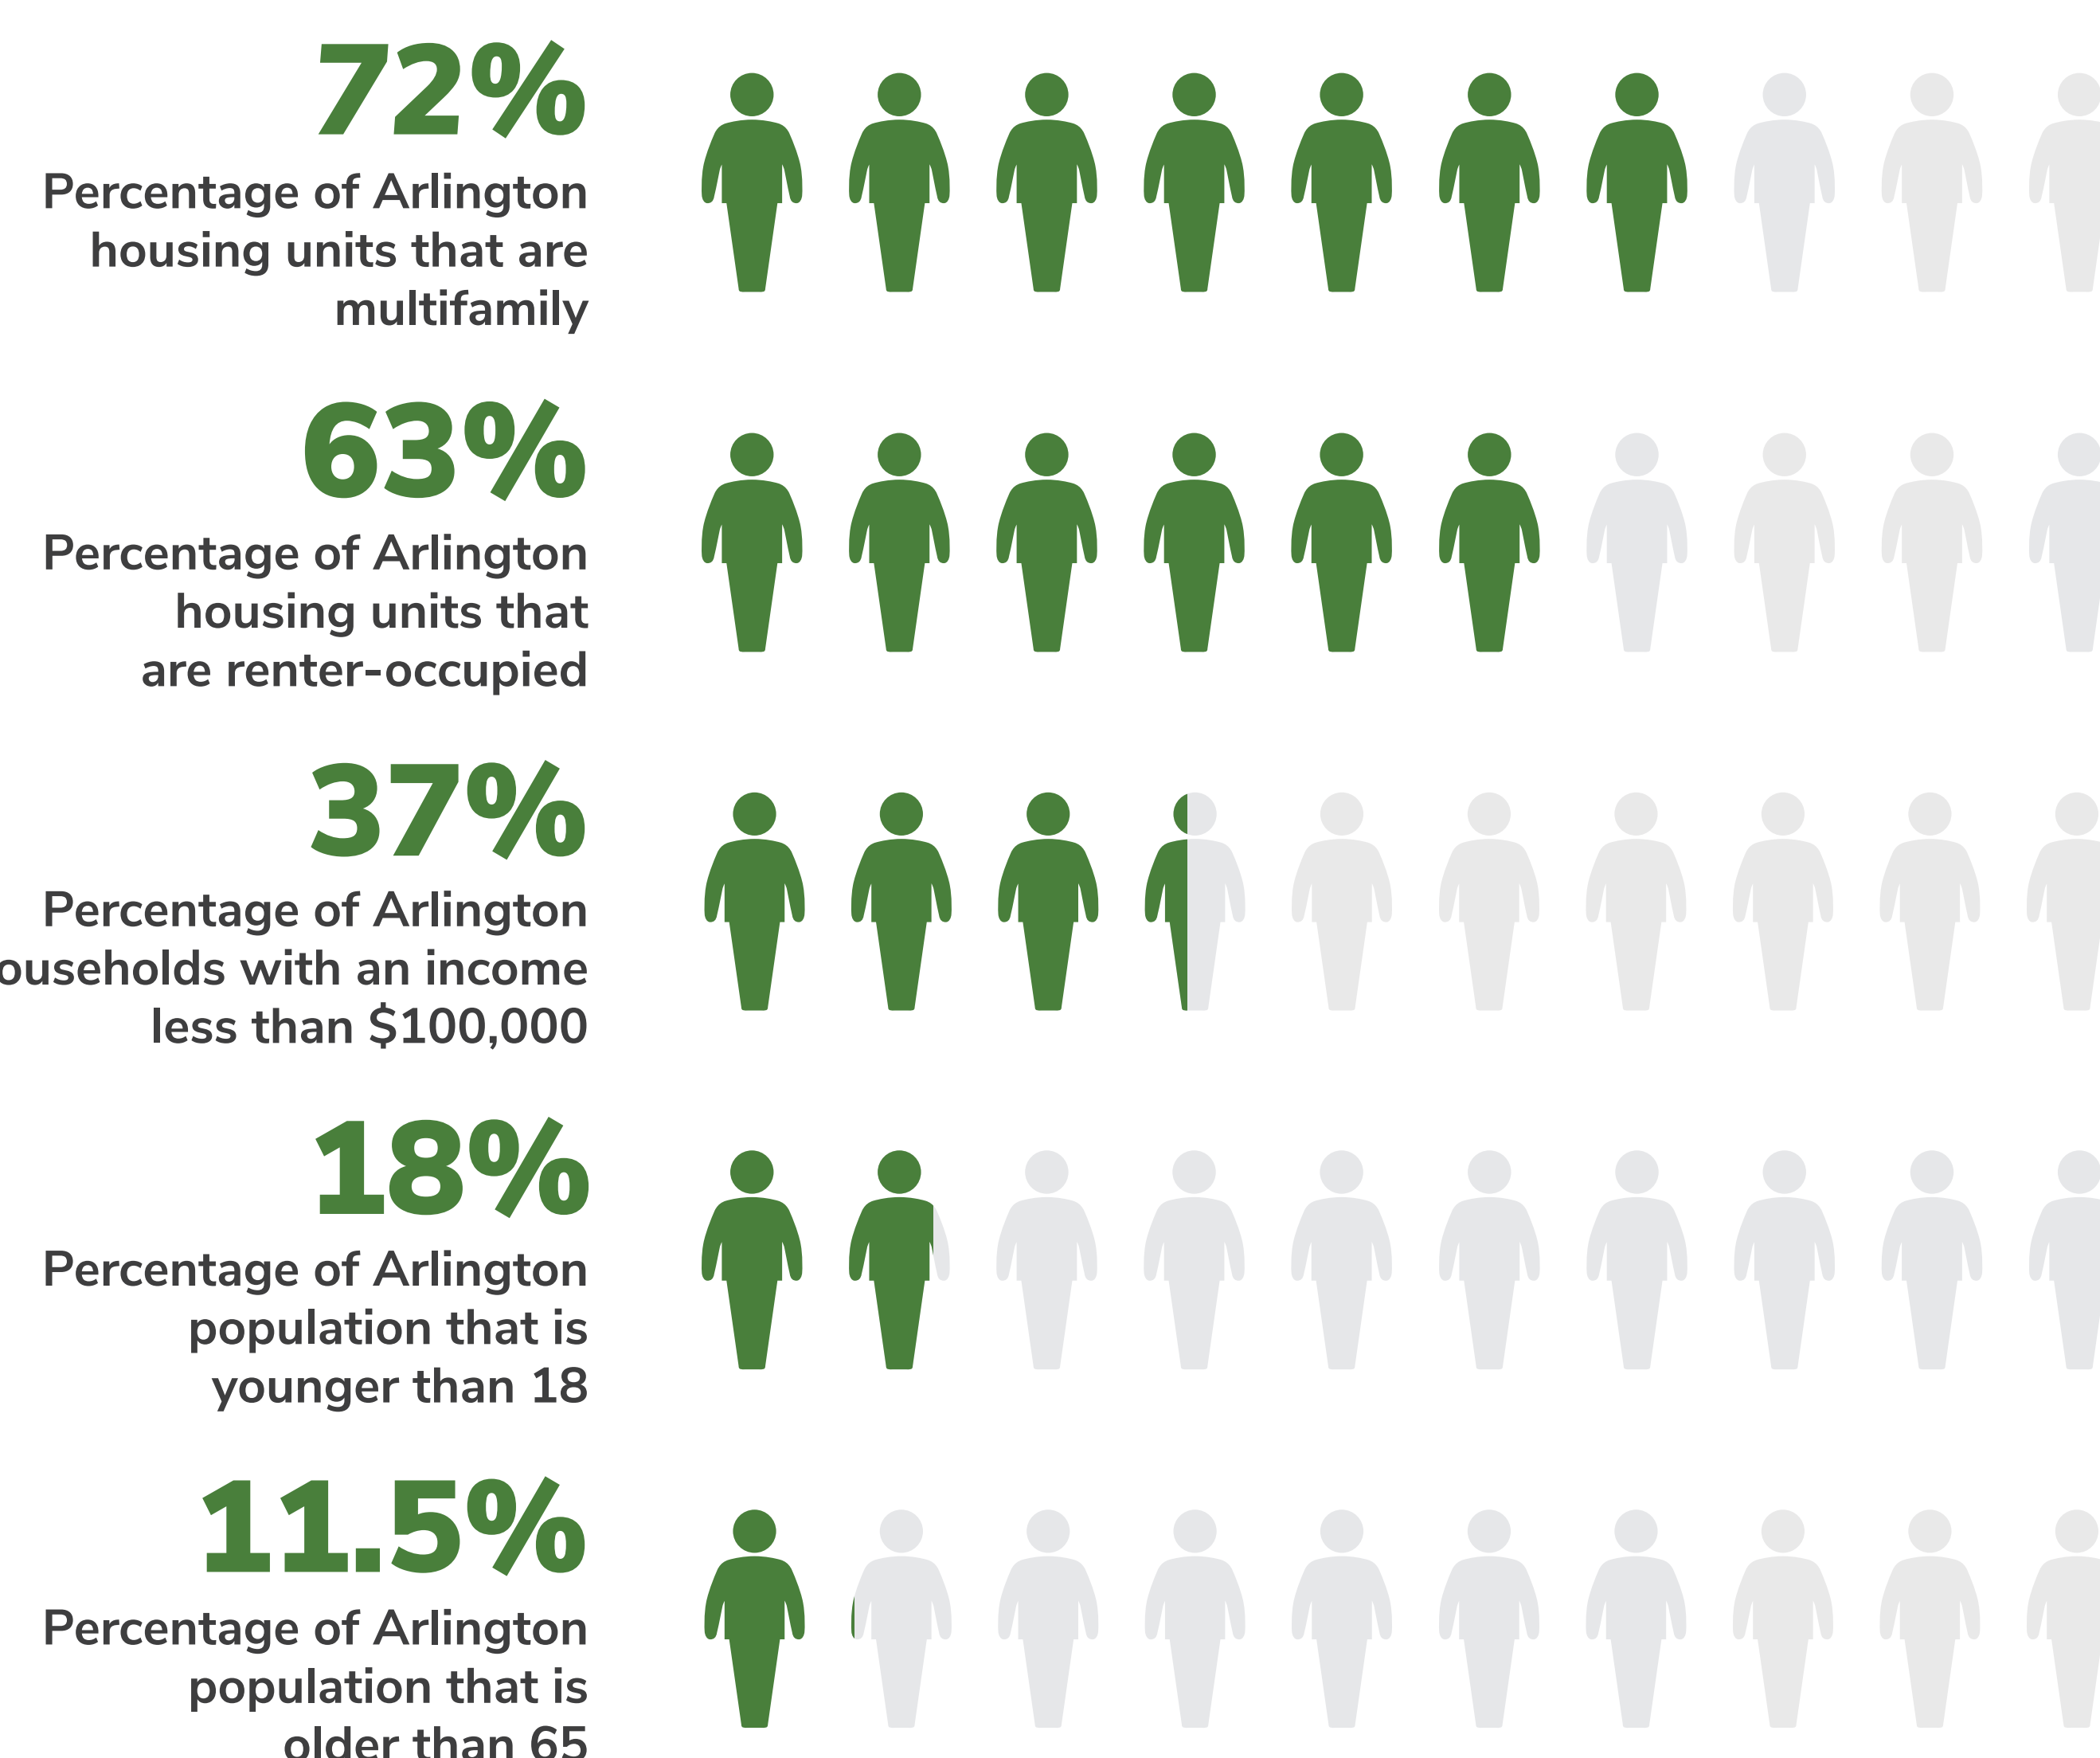

Demographics

35.3

Years Old

Arlington County's
Median Age

61,800 people commute into Arlington every day, increasing the County's daytime population by about 25% (on top of the existing residential population).

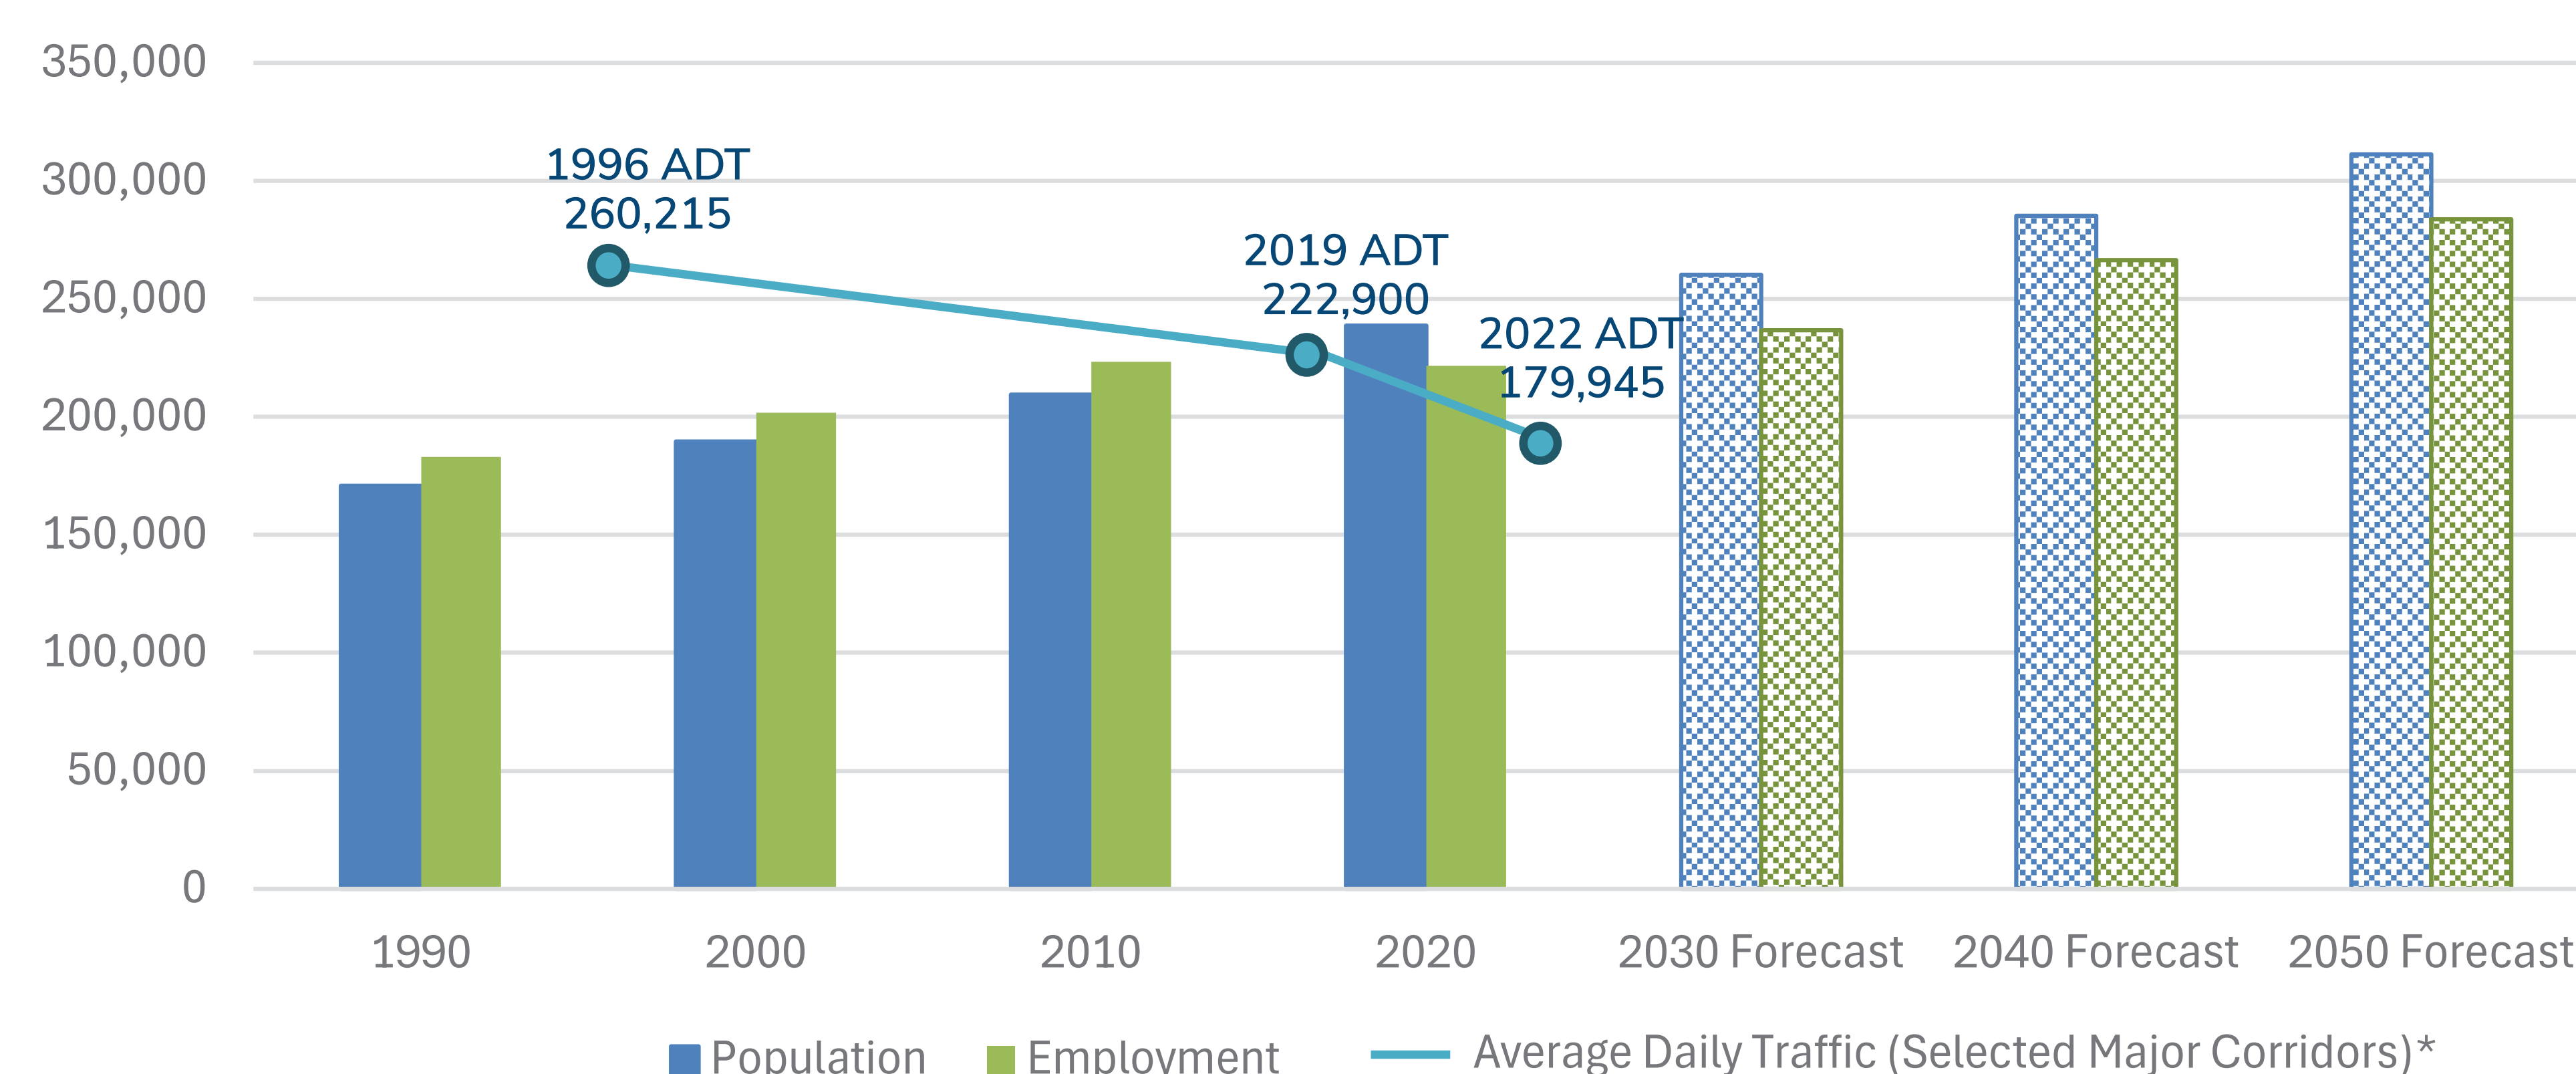

Source: U.S. Census Bureau 2022 5-Year Estimates

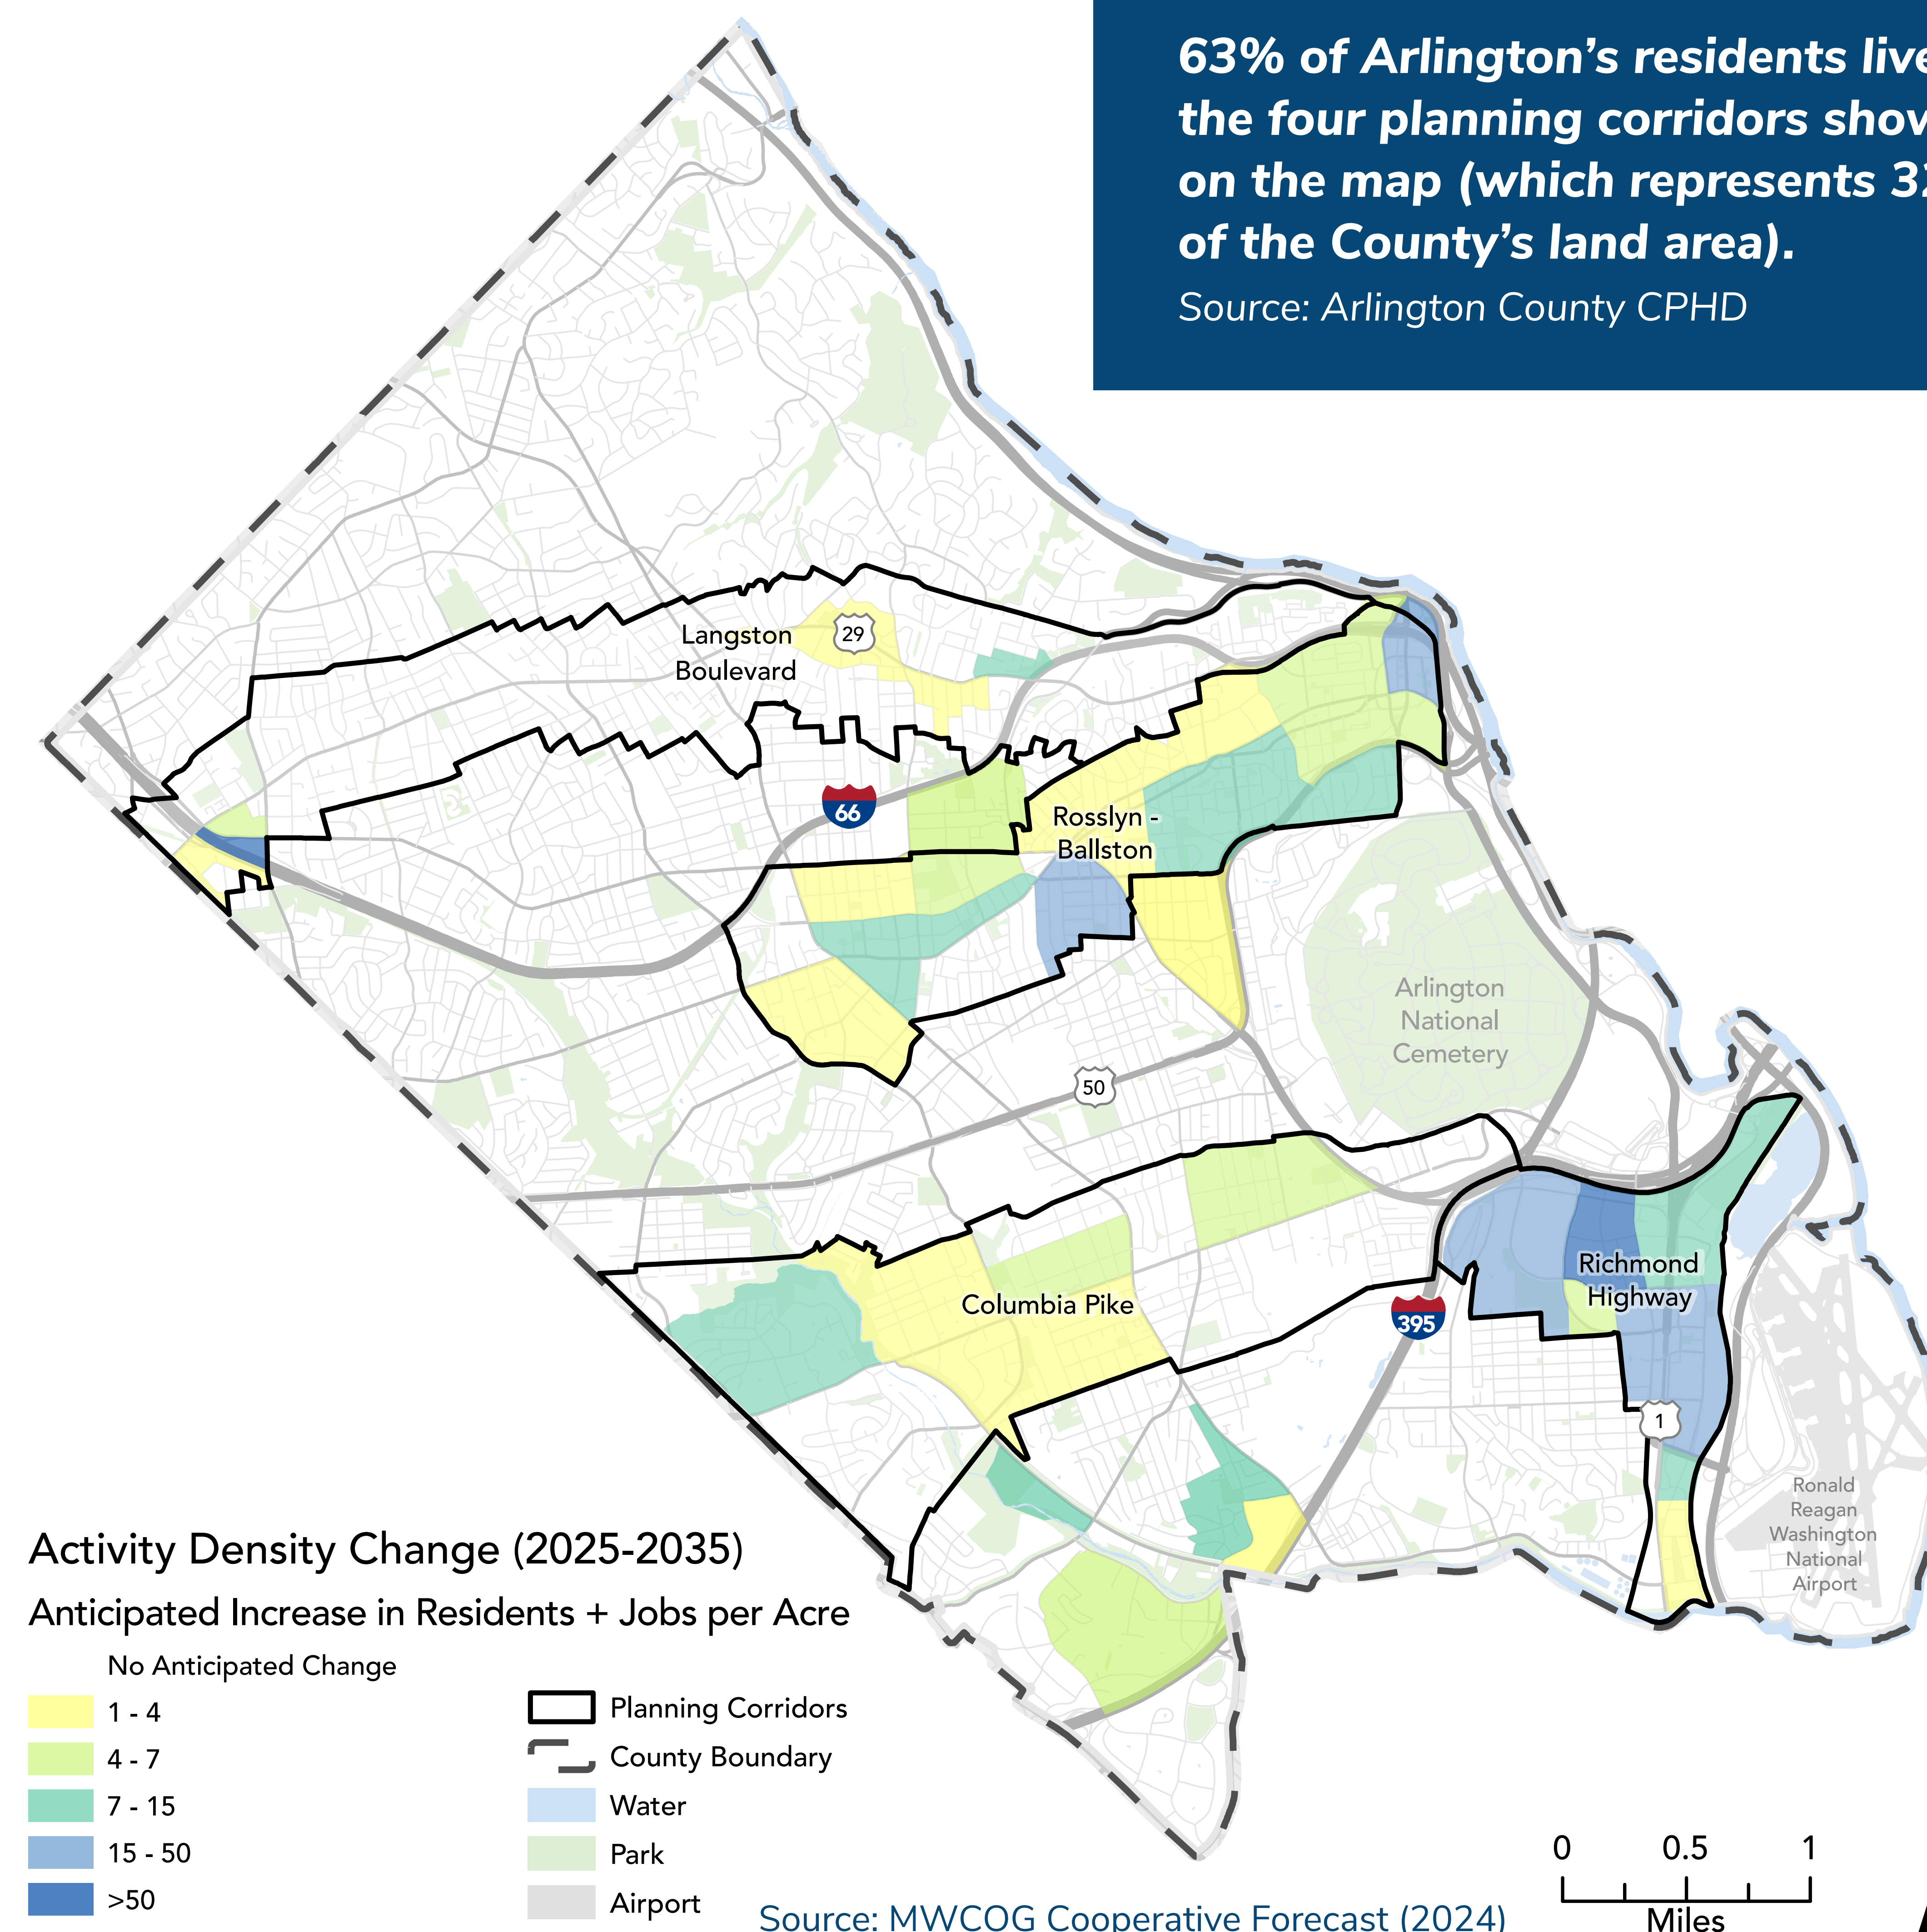

63% of Arlington's residents live in the four planning corridors shown on the map (which represents 32% of the County's land area).
