

Subject: DES/Fire - Previous Temporary Fire Stations

**FY 2017 – FY 2026 Proposed CIP
Work Session Follow-up**

July 15, 2016

The following information is provided in response to a question submitted by Mr. Vihstadt on July 12, 2016 at the CIP Work Session about the location and cost of the last temporary fire station.

During renovations of Fire Stations 2 and 9 in the 1990's, temporary facilities consisting of a trailer for staff and tent for apparatus were provided in each stations' parking lot. We do not have any data on costs for the temporary stations for FS's 2 & 9.

In 2014 Fire Station # 4 staff moved to Station #1 and #3 during the interior renovation and HVAC system replacement. A temporary relocation to other stations for Fire Station #8 would not be feasible due to distances of the other stations to Fire Station #8 service area.
